## SCHOOL FOR AGRICULTURE TO KICK OFF FIRST YEAR JOHN DE LA HOWE WILL PROVIDE AG EDUCATION

BY HANNAH ARNDT • IMAGES COURTESY JOHN DE LA HOWE SCHOOL FOR AGRICULTURE

On August 17, John de la Howe School for Agriculture will officially kick-off the 2020 school year, welcoming students from across the state to the newly renovated campus located in McCormick, South Carolina.

modern look to campus's landscape. However, original structures have not been altered in order to pay homage to the school's long history as one of the state's oldest learning facilities.

The school will focus on providing hands-on ag education through three pathways students can choose from: Environmental and Natural Resources Management, Horticulture, and Plant and Animal Systems.

Thompson

"We have hired a diverse group of teachers that are passionate about what they do," said Principal Gregory Thompson. "I am excited to see what the year holds."

All general education courses will have an ag focus and provide students with the opportunity to utilize the on-campus farmland, forests, and greenhouse operations.

Beyond the hands-on lessons that students will have the opportunity to participate in, there will also be structured extended learning hours to help students develop soft skills like financial literacy, first aid and gain certifications in specific focus areas.

Improvements have been made to virtually every area of the campus, from the cafeteria to the on-campus cottage housing, adding new technology and a

Just like many other schools in the state, John de la Howe has been working on plans to face the challenges presented by the coronavirus.

"We were on a roll before the coronavirus, with more and more people requesting information about the school and how to apply. Now we are learning how to adapt," added Thompson. Whether that means splitting school days, social distancing classrooms or learning from home, John de la Howe staff are prepared to help students and teachers stay safe while providing quality education.

Despite possible changes to the regular school day, John de la Howe has seen an uptick in interest in the school. "Ag education ultimately feeds the world and people are starting to be more aware of where their food comes from. Kids are starting to get interested in ag again," Thompson added.

"Our students coming to campus this fall are trailblazers and will make history," said John de la Howe President, Tim Keown. "With agriculture being our state's number one economic power, we are committed to offer a high-quality education to prepare our students to enter the industry."

Keown

John de la Howe is currently accepting and reviewing applications for the 2020-2021 school year. For more information, please visit [delahowe.sc.gov](http://delahowe.sc.gov).

COMMISSIONER OF AGRICULTURE

## TOUGH TIMES

Back when this pandemic and response started, we knew it would have far-reaching economic effects on our society, including agriculture. I hear from farmers and other businesspeople a lot about the difficulties they've faced as restaurants closed, consumers hunkered down, workers worried for their health, and everyone had to implement safety measures. I've heard some inspiring stories of farmers that managed to pivot their business models, and some tragic stories too.

Recently we got some data showing the effects of the pandemic on some of our smaller farmers, and it's not pretty. A survey of North and South Carolina farms by the Carolina Farm Stewardship Association conducted in April and May found that 76 percent of responding farms saw a decline in weekly sales due to coronavirus measures. One-third of those lost more than \$1,000 a week. These were small and medium-sized farms, almost all with sales of less than \$250,000 a year and about 41 percent with sales less than \$25,000 a year – so the drop in sales could be devastating. In fact, according to CFSA, "Many farmers said they will be out of business if COVID-19's effects last through the summer."

Along with COVID-19, some farmers are also struggling with flooded fields from all this rain, and row crop markets have been volatile. Poultry farmers had some flocks "spread out" as the market adjusted. A late spring hailstorm on peach farms just added to the woes.

If there's one thing I've learned in this job, it's that farmers are resilient. SCDA will keep on doing all we can to help farmers through these strange times. Remember to visit [agriculture.sc.gov/coronavirus](http://agriculture.sc.gov/coronavirus) to find out where to buy directly from farmers during this time, even after the economy continues to open back up. And don't forget that there's still federal aid available through the Coronavirus Food Assistance Program; farmers should get in touch with your local FSA office to apply.

On a more promising note, I was in Beaufort recently for an economic development meeting, and while I was there I had the opportunity to visit Lowcountry Produce Market and Café, a locally sourced grocery store. This entrepreneurial couple will have a first-class market featuring all South Carolina products. They hope to open next spring.

Like we've been reminded a million times. Stay safe. Do your part to slow this virus.

*Hugh Weathers*

UPCOMING EVENTS

**Fairfield Farmers and Artisans Market**  
July 18 & 25 • 9 am – 12 pm  
Locally grown produce, farm-raised local meats, eggs, local honey, dairy products, crafts and artwork, Artisan Soaps and body products, etc.

The South Carolina Market Bulletin

(ISSN 0744-3986)

The *Market Bulletin* is published on the first and third Thursday of each month by the SC Department of Agriculture, Wade Hampton Building, Columbia, SC 29201. Periodicals postage paid at Columbia, SC 29201.

Postmaster, send address changes to:  
SC Market Bulletin, PO Box 11280, Columbia, SC 29211

POLICIES FOR ADVERTISING

For full policies, visit:  
[agriculture.sc.gov/market-bulletin/market-bulletin-policies](http://agriculture.sc.gov/market-bulletin/market-bulletin-policies)  
Only ads pertaining to the production of agricultural products and related items are published. Ads are accepted for South Carolina items, even if the seller lives out of state, provided the item is in state at the time the ad is published and at the time of sale.

Ads are published free of charge and in good faith. The *Market Bulletin* reserves the right to edit and verify ads but assumes no responsibility for their content.

Ads cannot be accepted from agents, dealers, or commercial businesses, including real estate. Sealed bids, legal notices, or consignment sales are not accepted.

SUBMITTING ADS

No matter the submission method, you must include the advertiser’s name, complete address with zip code and county, and phone number with area code with your submission. Do not use all capital letters.

- **Email:** Send ads to [marketbulletin@scda.sc.gov](mailto:marketbulletin@scda.sc.gov). Put the words “Market Bulletin ad” in the subject line.
- **Online:** Go to [agriculture.sc.gov/market-bulletin](http://agriculture.sc.gov/market-bulletin). Select “Submit Market Bulletin Ad” and complete the form. If you include your email address, you will receive an automated reminder for a renewal.
- **Mail:** SC Market Bulletin, PO Box 11280, Columbia, SC 29211. You must use 8.5 x 11 inch paper.
- **Fax:** 803-734-0659

The deadline for submitting ads and notices is noon on Tuesday of the week **before** the publication date.

NEXT AD DEADLINE

JULY 21 • 12:00 PM

REMINDER TO ADVERTISERS

Ads are due by noon (12 pm) on the Tuesday after the latest published issue. Any ads received after the deadline will be considered for a subsequent issue.

BEWARE OF  
POTENTIAL  
HAY SCAMS!

Farmers are urged to be  
cautious when selling hay  
to new clients, especially  
those from out of state.  
If possible, verify the  
check before sending the  
hay. Speak to the buyer  
in person to verify all  
information.

SC FARM TO SCHOOL  
AWARDED NATIONAL GRANT

The South Carolina Department of Agriculture is pleased to announce that South Carolina Farm to School has received a USDA National Farm to School Grant.

With this USDA National Farm to School Grant, we will be able to further strengthen the farm to school efforts in South Carolina. We will work with schools, distributors, food service staff, and growers to expand the amount of Certified SC Grown produce in school cafeterias.

To achieve our goals, we will identify one school district in South Carolina for this two-year pilot program. With the help of this grant we plan to do the following:

- Provide Good Agricultural Practices (GAP) and food safety trainings for growers. We will help

- growers expand their markets to reach more schools in South Carolina.
- Work with experts in the field to provide procurement trainings for all school food service staff. We aim to make the procurement of locally grown products as simple as possible!
  - Provide educational trainings for school food service staff on the preparation of fresh fruits and vegetables. We will utilize the Palmetto Pick of the Month in all training aspects.
  - Provide agricultural education for students through a partnership with SC Ag in the Classroom.

For more information about how to get involved with SC Farm to School, please visit [scfarmtoschool.com](http://scfarmtoschool.com).

SC AGRIBIZ & FARM  
EXPO POSTPONED  
UNTIL 2022

BY MIRIAM PFLUG,  
SC AGRIBIZ & FARM EXPO

The SC AgriBiz & Farm Expo team wants to express our disappointment and regret to announce that the 2021 AgriBiz Expo will be postponed until 2022.

As planning for the Expo begins the summer of the prior year, the team has met and after much discussion and due consideration have determined that it is in the best interest of all concerned to postpone the 2021 Expo. The unknown health and safety risk and exposure are paramount in our minds and hearts. We are also concerned about planning, preparing, scheduling speakers, promoting, renting the facility and other expenses and then being forced to cancel in early January. That could put everyone in financial jeopardy.

We thank you for your past dedication and support. Our plans include a bigger and stronger Expo in 2022. It is always our pleasure to work with each of you. Please reach out to any of our team members with questions.

We look forward to working with you as we execute plans for 2022.

## BARNWELL COUNTY FARM PRESERVES LAND IN ACE BASIN

BY ERIN EISELE, CONGAREE LAND TRUST • PHOTOS COURTESY CONGAREE LAND TRUST

329.92 acres of privately owned farmland in Barnwell County are now conserved, thanks to the collaborative efforts of the Congaree Land Trust (CLT), the South Carolina Conservation Bank (SCCB) and the Bedingfield family. Now under conservation easement, Wild Turkey Creek Farm will remain a working family farm, preserving precious open land for agriculture and timber forever.

“This legacy farm is a great example of how South Carolina farming families can take advantage of conservation easement programs to safeguard agricultural lands for future generations,” says Mary Crockett, CLT Land Protection Director. “It has been a pleasure working with the Bedingfield family, furthering our commitment to conserve private land for agriculture, while protecting wildlife habitat, Carolina Bays, and riparian areas to improve air and water quality for all.”

Wild Turkey Creek Farm, named after a tributary of the Salkehatchie River on the property, is a part of the ACE Basin (Ashepoo-Combahee-Edisto Rivers), one of the largest wetland ecosystems

on the Atlantic coast. The property consists of a diverse ecosystem including loblolly and longleaf pine stands, bottomland hardwoods, approximately five acres of an old Carolina Bay, and nearly a mile of forested wetlands along Turkey Creek. These wetlands help filter water flowing to the Salkehatchie River before entering the Atlantic Ocean, and support an abundance of wildlife.

“We are pleased to collaborate with Congaree Land Trust on saving important wildlife habitat and sustaining water quality in the Salkehatchie River watershed.” says Raleigh West, SCCB Director.

Bird life is abundant on the property, as the farm’s name suggests. Sixteen species of birds considered of conservation priority concern by the South Carolina Department of Natural Resources are found here, from wading birds, such as green herons, to Neotropical migratory birds like the black-throated blue warbler, scarlet tanager, and wood thrush. Turkey Creek provides important habitat for freshwater aquatic species and helps maintain recreational water quality of the Salkehatchie, which originates in the city of Barnwell and flows onto the Combahee River and into Saint Helena Sound before entering the Atlantic Ocean.

In addition to timber, the Bedingfields grow and sell seasonal agricultural crops like corn,

watermelon, and others. An old historic farmhouse from the early 1900s still sits on the property.

“We are excited to conserve, protect and enjoy our property for many years to come,” landowner Will Bedingfield says. “It has been a pleasure to work with both Congaree Land Trust and S.C. Conservation Bank on our conservation easement.”

Wild Turkey Creek Farm is located in the ACE Basin Focus Area which is a conservation project consisting of over 160,000 acres of private and public lands. The property joins 16,458 acres of prime farmland in central South Carolina that are permanently protected by CLT through conservation easements, as well as over 1,500 acres currently conserved by CLT in the Salkehatchie River watershed. Conserving these lands preserves the health of our watersheds, protects water quality for citizens and enriches the natural resource economy of our state.

## ADDITIONAL COMMODITIES ELIGIBLE FOR CORONAVIRUS FOOD ASSISTANCE PROGRAM

BY USDA

On July 9, U.S. Secretary of Agriculture Sonny Perdue announced an initial list of additional commodities that have been added to the Coronavirus Food Assistance Program (CFAP), and that the U.S. Department of Agriculture (USDA) made other adjustments to the program based on comments received from agricultural producers and organizations and review of market data. Producers will be able to submit applications that include these commodities on Monday, July 13, 2020. USDA’s Farm Service Agency (FSA) is accepting through Aug. 28, 2020, applications for CFAP, which helps offset price declines and additional marketing costs because of the coronavirus pandemic. USDA expects additional eligible commodities to be announced in the coming weeks.

“During this time of national crisis, President Trump and USDA have stood with our farmers, ranchers, and all citizens to make sure they are taken care of,” said Secretary Perdue. “When we announced this program earlier this year, we asked

for public input and received a good response. After reviewing the comments received and analyzing our USDA Market News data, we are adding new commodities, as well as making updates to the program for existing eligible commodities. This is an example of government working for the people – we asked for input and we updated the program based on the comments we received.”

USDA collected comments and supporting data for consideration of additional commodities through June 22, 2020.

Changes to CFAP include:

Adding the following commodities: alfalfa sprouts, anise, arugula, basil, bean sprouts, beets, blackberries, Brussels sprouts, celeriac (celery root), chives, cilantro, coconuts, collard greens, dandelion greens, greens (others not listed separately), guava, kale greens, lettuce – including Boston, green leaf, Lolla Rossa, oak leaf green, oak leaf red and red leaf – marjoram, mint, mustard, okra, oregano, parsnips, passion fruit, peas (green), pineapple, pistachios, radicchio,

rosemary, sage, savory, sorrel, fresh sugarcane, Swiss chard, thyme and turnip top greens.

Expanding for seven currently eligible commodities – apples, blueberries, garlic, potatoes, raspberries, tangerines and taro – CARES Act funding for sales losses because USDA found these commodities had a 5 percent or greater price decline between mid-January and mid-April as a result of the COVID-19 pandemic. Originally, these commodities were only eligible for marketing adjustments.

Determining that peaches and rhubarb no longer qualify for payment under the CARES Act sales loss category.

Correcting payment rates for apples, artichokes, asparagus, blueberries, cantaloupes, cucumbers, garlic, kiwifruit, mushrooms, papaya, peaches, potatoes, raspberries, rhubarb, tangerines and taro.

Additional details can be found in the Federal at [farmers.gov/cfap](http://farmers.gov/cfap).

# ACRE AWARDS SEVEN ENTREPRENEURS FUNDING FOR THEIR SC AGRIBUSINESSES

BY JEREMY WARD, AGRIBUSINESS CENTER FOR RESEARCH AND ENTREPRENEURSHIP

As South Carolina begins the fierce drive back from the economic shock of COVID-19, agribusinesses will be leading the way in our rural towns. Whether farms have been in business for 300 years or a few months, all have a vital contribution to make to our state’s recovery.

With this in mind, the Agribusiness Center for Research and Entrepreneurship (ACRE) was proud to award grants to seven innovative, hard-driving farms around the state this spring. These grants were up to \$30,000, but varied by awardee. ACRE will help advance these businesses in the marketplace through mentoring, networking, and funding as part of our mission to strengthen rural South Carolina.

## KRISTEN BEIGAY EARTHEN ORGANICS

Located in Easley, Kristen Beigay and her team have an unusual business goal: to create soil. By harnessing the power of the humble earthworm, Earthen Organics is churning out high-quality organic fertilizer in the form of worm castings to farmers and gardeners in Anderson County and beyond.

Beigay explains that “chemical-driven farming methods continue to deplete nutrients and biological life from the soil they work. We aim to rehabilitate and replenish the soil while also helping our customers grow healthy, hearty plants.” Her natural fertilizer has a threefold purpose – providing immediate nutrients to plants, suppressing insects and pathogens, and diverting local food waste at the same time.

With their ACRE grant, Earthen Organics will create an online store for direct-to-consumer sales, as well as purchasing new machinery to allow creation of custom soil mixes.

## BEN CRAWFORD AND REBECCA GOLDBERG WOODLAND VALLEY MUSHROOMS

Based out of Jackson in Aiken County, Woodland Valley uses climate-controlled shipping containers to intensively grow gourmet mushrooms. Their current product line includes oyster, shiitake, lions mane, and maitake mushrooms, all of which are in high demand across the state.

Their unique business model alone stands out, as does their commitment to improve the local economy of Aiken through job creation and agricultural education. With the ACRE grant, they intend to purchase the equipment necessary to ramp up mushroom production sixfold.

“Our passion is promoting health and sustainability through agriculture,” says Goldberg. “With this expansion we will create jobs in our rural community and have an impact on regional food security while bringing a slice of the \$1.5 billion national mushroom market to South Carolina.”

## MICHELLE DUCWORTH TWIN CREEKS LAVENDER

If you’ve never seen the beauty of a lavender farm, with its rows of brilliantly purple flowers, you might be forgiven – after all, there are not too many around. Twin Creeks Lavender, based in Williamston (Anderson County), holds the distinction of being one of the only lavender farms in the state. They are unequivocally the only lavender farm offering U-Picks, and also create a score of value-added lavender products themselves.

As an organic farm growing a flowering herb, Ducworth realizes that her position is fairly unique. It is that uniqueness that has helped power the farm’s growth. Ducworth enjoys “showing folks that a large operation can be run organically, and that you don't have to farm something edible to have a beautiful revenue-generating farm.”

With the ACRE grant, Twin Creeks will construct a new drying barn, which they anticipate will double their production and sales capabilities.

## ALICIA HOLBROOK CAROLINA PRIDE PASTURES

Diversification has been a key word for the survival of the modern farm, and agritourism has been an integral part of many farmer’s financial plans. Alicia Holbrook, raising alpacas for their fiber in Pomaria (Newberry County), was one such farmer. The disruption caused by an untimely pandemic required agritourism itself to diversify, and Holbrook met the challenge head-on.

She has created a virtual educational program for her farm, intended to show travel-restricted classrooms the wonders of an alpaca farm. “Our virtual field trips,” she says, “will showcase the diverse agriculture in South Carolina to the entire nation and hopefully the world. Our programs show how leveraging new technology and new thinking can advance agriculture beyond the pastures and fencing.”

## PATRICK MYERS LOWCOUNTRY CREAMERY

Talking with Patrick Myers leaves you with one singular impression: He’s a fan of cows. As part owner of the Bowman-based dairy and creamery, Myers and his partners plan to take their herd of Jersey cows and wide product line exclusively to the direct consumer.

The nutritious value of Jersey milk is well-known yet somewhat exclusive, and the plan is to increase supply of their products to the consumers in Orangeburg County and beyond.

“Our product mix,” Myers explains, “allows us to stand alone. We are the only greek yogurt and crème fraiche producers in the state and we plan to add other products with our next expansion, including but not limited to flavored yogurts, cheeses, and ice cream.”

## CACI NANCE NANCE FARM CREAMERY

As a 12th generation dairy farmer in the small town of McConnells (York County), Caci Nance witnessed the collapse of historic dairies across the country, and realized that it was time to reorganize. She and her husband William recognized the lack of fresh dairy products in the York/Chester area, and founded the creamery to both save their dairy and address this problem.

As the only creamery in the area, the Nances plan to supply the local community with their milk directly, filling a gap in local food availability. Caci explains that “the ACRE grant is a wonderful kickstart to our creamery helping provide us with the funds for refrigeration equipment, marketing and bottling cost.”

## MATTHEW AND KARA RUTTER PROJECT VICTORY GARDENS

There is an oncoming crisis in agriculture, as current farmers are aging and not enough new farmers are filling the ranks. Based out of Aiken, the Rutters have a plan to tackle this problem. With a cumulative 45 years of service in the U.S. Army, they have witnessed both the toll of military service and the skills that translate well to agriculture.

Thus, they created Project Victory Gardens, a diversified farm on 20 beautiful acres. Conveniently located to major military bases, their mission is both to heal and educate veterans through resiliency training and agricultural education.

“By educating and encouraging veterans to enter agribusiness,” Matthew says, “Project Victory Gardens will help to reduce the age of American farmers while providing an employment opportunity which will naturally increase food security across our great state.” With their ACRE grant, they plan to construct a certified farm kitchen to aid in their education efforts.
