SC LEGISLATORS ENJOY OFFICIAL STATE SNACK

BY EVA MOORE

The S.C. General Assembly designated the boiled peanut the official State Snack Food on May I, 2006. Fifteen years later, the South Carolina Department of Agriculture teamed up with Heritage Peanut Co. to give a package of boiled peanuts to every state lawmaker.

grew 82,000 acres of peanuts. Peanuts are grown in the Midlands, Pee Dee and Lowcountry regions of the state.

Boiled peanuts, meanwhile, are an essential and delicious part of South Carolina culture. Boiled

Jared Jester poses in front of the State House with ACRE Executive Director Kyle Player. Jester won grant funding and mentoring from ACRE in 2019 for his Heritage Peanut Co.

Jared Jester and Lauren Michalski of Heritage Peanut Co. delivered peanuts to state legislators' offices.

SCDA staff enjoyed boiled peanuts and sunshine in celebration of South Carolina's official State Snack.

The Bluffton, South Carolina-based Heritage Peanut Co. was awarded grant funding in 2019 by the department's Agribusiness Center for Research and Entrepreneurship (ACRE) to help distribute and market its packaged boiled peanuts.

Peanuts are an important South Carolina crop: Last year, farmers in the state peanuts can be made using raw peanuts, which are uncooked and dried; or green peanuts, which are freshly harvested. South Carolina farmers usually begin harvesting green peanuts in July.

"Boiled peanuts are part of what makes South Carolina special, and they wouldn't be possible without peanut farmers," said Commissioner of Agriculture Hugh Weathers.

The state honors many of its agricultural products with official designations: South Carolina's state fruit is the peach, the state beverage is milk and the state vegetable is collard greens.

COMMISSIONER'S CORNER

HUGH E. WEATHERS

SOUTH CAROLINA
COMMISSIONER OF AGRICULTURE

A GREAT HONOR FOR A GREAT MAN

friend Martin
Eubanks
passed away in January
2020, I knew we needed
to do something out of
the ordinary to honor him.

Agriculture attracts a lot of passionate people, and none more so than Martin. In 33 years at the South Carolina Department of Agriculture, he helped elevate the state's produce industry through lasting relationships and innovative marketing. He started with the department as a marketing specialist for the South Carolina Peach Council, eventually becoming an assistant commissioner. He helped develop the Certified South Carolina program, one of the department's resounding successes. Martin also helped create the Southeast Produce Council to connect buyers from Southeastern states with fresh produce shippers and producers.

Martin worked hard, and he was a lot of fun, too. His enthusiasm was infectious, and he was deeply interested in helping young people advance in agriculture and the produce business.

That's why I'm so pleased to share some information about Eubanks Farm.

With our help, the new South Carolina Governor's School for Agriculture at John de la Howe plans to establish

an on-campus commercial fruit and vegetable operation named for Martin. As you know if you've been reading your Market Bulletin, John de la Howe is an agriculture-focused high school in McCormick, South Carolina, and was recently named the third Governor's School in the state. Eubanks Farm will provide hands-on horticulture training experience for students using state-ofthe-art equipment and technology to prepare them for a future career in the produce industry.

We're raising money for the Eubanks Farm through the nonprofit South Carolina Advocates for Agriculture. To make a donation to the Eubanks Farm Memorial Fund, make checks payable to SC Advocates for Agriculture - Eubanks Farm, and mail to 901 Main Street, Suite 1225, Columbia, South Carolina, 29201. Please contact Hannah Arndt at 803-734-2179 or harndt@scda.sc.gov with any questions.

Paddle and Pancakes

May 22 • 8:30 - 10 am

Work up an appetite by spending a beautiful morning kayaking on the still waters of Lake Haigler! Our guide will outfit you with a kayak and Personal Flotation Device (PFD) at the Rush Pavilion and make sure everyone is comfortable using their paddles and kayaks. We will then head out on Lake Haigler and explore the environment that surrounds it, at your pace. After, enjoy a delicious pancake breakfast served at the Greenway Gateway Canteen. All ages - children under eight years old must be accompanied by an adult in a tandem kayak. Price: \$32 for a single, \$37 for a tandem. \$6 discount for members. Includes breakfast.

Anne Springs Close Greenway 2573 Lake Haigler Drive, Fort Mill 803-547-4575 facebook.com/ASCGreenway

86th Running of the Carolina Cup

May 22 • 9 am

This annual 'rites of spring' draws over 70,000 fans from throughout the Southeast, to enjoy the riveting sport of steeplechase horse racing amid a flurry of spring fashions and extravagant tailgate parties. From the Hospitality Terrace to our Vendor Village, friends and family unite for an exciting afternoon of six races. Regular admission is \$45 up until race day. We also offer reserved parking packages that include 2 general admission tickets. Larger group reservations can be accommodated by our Meadow Package. Please call the office with any questions.

Springdale Race Course, Camden

Ag + Art Tour - Colleton County

May 29 & 30

Sat • 10 am - 4 pm | Sun • 1 - 5 pm The Ag + Art Tour is a free, self-guided tour of some of South Carolina's farms featuring local artisans and farmer's markets. During this weekend-long event you will have the opportunity to see first-hand where your food comes from, watch artists in action and purchase their works, dance to the melodies of bluegrass and folksongs, and learn more about rural life.

(ISSN 0744-3986)

The Market Bulletin is published on the first and third Thursday of each month by the SC Department of Agriculture, Wade Hampton Building, Columbia, SC 29201. Periodicals postage paid at Columbia, SC 29201.

Postmaster, send address changes to: SC Market Bulletin, PO Box 11280, Columbia, SC 29211

POLICIES FOR ADVERTISING

For full policies, visit:

agriculture.sc.gov/market-bulletin/market-bulletin-policies

Only ads pertaining to the production of agricultural products and related items are published. Ads are accepted for South Carolina items, even if the seller lives out of state, provided the item is in state at the time the ad is published and at the

Ads are published free of charge and in good faith. The Market Bulletin reserves the right to edit and verify ads but assumes no responsibility for their content.

Ads cannot be accepted from agents, dealers, or commercial businesses, including real estate. Sealed bids, legal notices, or consignment sales are not accepted.

SUBMITTING ADS

No matter the submission method, you must include the advertiser's name, complete address with zip code and county, and phone number with area code with your submission. Do not use all capital letters.

- Email: Send ads to marketbulletin@scda.sc.gov. Put the words "Market Bulletin ad" in the subject line.
- Online: Go to agriculture.sc.gov/market-bulletin. Select "Submit Market Bulletin Ad" and complete the form. If you include your email address, you will receive an automated reminder for a renewal.
- Mail: SC Market Bulletin, PO Box 11280, Columbia, SC 29211. You must use 8.5 × 11 inch paper.
- Fax: 803-734-0659

The deadline for submitting ads and notices is noon on Tuesday of the week before the publication date.

NEXT AD DEADLINE

MAY 25 • 12:00 PM

REMINDER TO ADVERTISERS

Ads are due by noon (12 pm) on the Tuesday after the latest published issue.

Any ads received after the deadline will be considered for a subsequent issue.

JUNE IS BEEF MONTH

BY SOUTH CAROLINA BEEF COUNCIL

The South Carolina cattle and beef industry will celebrate "June as Beef Month" here in the Palmetto State. This industry is a top-10 agriculture cash commodity (\$133.7 million) and contributes to new wealth and economic growth for our state year-round, but is specially recognized for its importance during June.

Today's consumers can be assured producers are committed to providing safe, lean, and nutritious beef.

Mr. Darren Carter, a cattle producer for Ninety-Six and Chairman of the SC Beef Council said, "Lean beef is important to each individual and it promotes a healthy lifestyle". He encourages the use of beef in meal solutions to get ZIP (zinc, iron, and protein).

Mr. John Fogle, a cattle producer from Blythewood and President of the Richland County Cattlemen's Association, stated, "The 3,200 plus cattle producers in South Carolina raise quality, safe animals on their farms each day." South Carolina cattle producers care for their animals and land the same as their individual families.

As the summer months begin, both Carter and Fogle continue to promote beef to consumers, especially grilling for Father's Day on Sunday, June 15, as well as, all during the Summer Grilling Season (Memorial Day throughout Labor Day).

For additional information on both organizations of "Beef: It's What's For Dinner" campaign, please contact Roy Copelan (email: scbeef@scda.sc.gov or telephone: 803- 917-1119).

SC PRODUCE INDUSTRY LEADERS NETWORK IN NJ AT SCDA TOPGOLF EVENT

On Tuesday, April 27, the Eastern Produce Council hosted its first event of 2021 with the South Carolina Department of Agriculture at TopGolf in Edison, New Jersey.

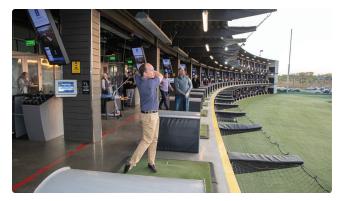

South Carolina Commissioner of Agriculture Hugh Weathers, SCDA staffers, and representatives from the SC Peach, Watermelon, and Specialty Crop councils shared information about South Carolina produce and mingled with the group throughout the night.

"People were happy to be out, together with their colleagues from the produce industry," said Susan McAleavey Sarlund, Executive Director of the EPC, in a press release. "It was a fun event and showed us that people are ready to socialize again; it was great to see."

EPC also gave a generous \$5,000 donation to the Eubanks Farm Memorial Fund. Read more about this new venture to honor Martin Eubanks in Commissioner's Corner on page I.

L to R: Chris Yonce, SC Peach Council President; Weatherly Thomas, SC Specialty Crop Growers Association; Susan McAleavey, EPC Executive Director; Stevie Stills, SC Watermelon Association; Hugh Weathers, SC Commissioner of Agriculture; Katie Pfeiffer, SCDA Market Development Coordinator; Kelly Davis, Allegiance Retail Services and EPC VP; Michelle Cantey, SCDA Senior Director of Marketing; Marianne Santo of Wakefern Food Corp and EPC President; Tracy Simmonds of Affinity Sales and EPC Board Member; Jack Shuler, SCDA Economic Development Director; and Clint Leach, SCDA Assistant Commissioner.

AGSOUTH FARM CREDIT OFFERS FREE FARM FINANCIAL TRAINING

BY AGSOUTH FARM CREDIT

STATESBORO, GA: "The farmer is the only man in our economy who buys everything at retail, sells everything at wholesale, and pays the freight both way." – John F. Kennedy

FARMERS ARE CEO'S

Most farmers would never consider themselves a CEO – but that's exactly what they are. They are the chief decision makers, overseeing a business. They also wear the hat of mechanic, meteorologist, agronomist, veterinarian, engineer, nutritionist, and more.

Farming today truly is a business, and requires knowledge not just of how to grow crops and raise livestock, but also how to manage both finances and risk. With a tight farm economy, understanding how to manage the farm finances and using records to make decisions is more critical than ever.

At Farm Credit, we want your farming operation to be successful. Whether you are coming home to the family farm, starting a first generation business, or if you grow row crops, livestock, or vegetables, we recognize the need for all farmers to know more about business and financial management.

AGAWARE SERVES THE NEXT GENERATION

In 2011, AgSouth Farm Credit created the national

award-winning AGAware® program to help ensure that future farmers will be prepared and strong financially so they may continue doing what it is they love. It's been Farm Credit's mission for more than one hundred years to serve farmers and rural America.

AGAware® consists of both farm finance training workshops for young, beginning, and small farmers as well as community awareness events to help make consumers aware of what farmers actually do to put food on everyone's table.

Since the AGAware® program was established in 2011, more than 800 farmers in Georgia and South Carolina have taken the classes and graduated from the program.

2021 FARM FINANCE TRAININGS

The AGAware® Workshops introduce farmers to a variety of financial related topics critical to running an operation. These topics include Balance Sheets, Income Statements, Family Finance & Family Budgeting, Risk Management, Accrual Income, Applying for Financing, Preparing a Business Plan, Technology & Record Keeping, FSA/SBA and Other Programs.

AGAware® is also certified for FSA Direct Borrower Training Credit.

The training is open to anyone who wishes to develop a better understanding of how to run a successful farming operation, of any type and size.

All classes are held from 9:00 a.m. – 4:00 p.m., and a free lunch will be provided. Workshops will be held at the following locations:

Friday, July 23 | Elloree, SC | Camp Daniels, SC State | 116 Camp Daniels Rd

Friday, July 30 | Waycross, GA | Ware Co. High School Ag Center | 700 Victory Dr.

REGISTER: AgSouthFC.com/AGAware

Friday, August 13 | Louisville, GA | Home Fresh Bistro | 128 W Broad St.

Friday, August 27 | Tifton, GA | UGA Tifton Conference Center | 15 RDC Rd.

REGISTER: AgGeorgia.com/AGAware

For more information about AGAware, contact Heather Brannen at HBrannen@AgSouthFC.com or 912-764-9091.

CLEMSON ORGANIC PLANT BREEDING INSTITUTE SET FOR JUNE 7 – 10 ONLINE

BY DENISE ATTAWAY, CLEMSON UNIVERSITY

CLEMSON, S.C. — Sustainability is key for the future of food production and Clemson researchers are helping the next generation of plant breeders learn how to develop plants that are healthy for humans and safe for the environment.

The researchers are offering a free Organic Plant Breeding Institute to teach techniques for growing organic foods.

The institute will be offered virtually June 7-10. Institute organizers and principal investigators Dil Thavarajah and Rick Boyles said this workshop is designed for students and scholars, as well as anyone else interested in plant breeding and genetics of organic production systems, crop biofortification and human health. The institute is funded by an Organic Agriculture Research and Extension Initiative grant from the United States Department of Agriculture, National Institute of Food and Agriculture.

"During the Organic Plant Breeding Institute, participants will learn about organic techniques for growing pulse crops and cereal crops to help meet future nutrition demands," said Thavarajah, a researcher in the Department of Plant and Environmental Sciences. "Students will learn about plant breeding methods, available technologies, phenotyping techniques that can be used in fields and greenhouses, as well as biofortification and more."

Sarah Powers is a Clemson University doctoral candidate from Lexington, North Carolina, who believes learning how to grow organic foods will be important to feeding a global population expected to reach 10 billion people by 2050. Her research looks at how organically growing pulse crops can improve nutrition while lowering production costs. Her research focuses on phosphorus-use efficiency in field peas.

"Our population is growing at an exponential rate," Powers said. "We're running out of some of the

resources we've always relied on in conventional agriculture. So, switching over to more organic and sustainable practices is really important for our future."

Boyles said the institute will include presentations from world-renowned plant breeding and nutrition experts as well as training sessions focused on practical breeding techniques, genomic data processing, genetic mapping, and genomic prediction.

"We're combining proven research strategies to improve the productivity and quality of crops under low-input, organic management practices. Workshop topics include organic breeding, biofortification, DNA sequencing and processing, genomics and nutrigenomics, phenotyping techniques, organic production, as well as management and processing.

Skills that students gain by attending the institute will be very marketable and will make them very well prepared for the workforce," said Paula Agudelo, College of Agriculture, Forestry and Life Sciences associate dean for research and director of the Clemson University Experiment Station.

For information, go to <u>clemson.edu/cafls/organicbreeding/orei/opbi/index.html.</u>

Learn techniques for growing organic foods during Clemson University's Organic Plant Breeding Institute June 7–10.

As research results and products are generated from these efforts, we're working closely with extension personnel to maximize outreach and support the land-grant mission of Clemson University," said Boyles, a researcher at the Pee Dee Research and Education Center. "As part of the Advanced Plant Technology Program, we're also training the next generation of plant breeders and scientists."

Land-grant universities were created by the U.S. Congress in every state to provide educational opportunities for all residents through teaching, research and the Cooperative Extension Service Clemson's statewide Public Service and Agriculture (PSA) system conducts research, Cooperative Extension Service and regulatory programs that improve and protect economic prosperity and well-being for all South Carolina residents. These programs develop and deliver impartial sciencebased information in five areas that align with the

7

national land-grant university system and touch the life of every South Carolina resident. Programs are provided in these areas: agribusiness productivity and profitability; economic and community development; environmental conservation; food safety and nutrition; and youth development and families.

For more information on programs, contact the local Clemson Extension office.

AGRICULTURE AND ART UNITE TO TEACH ABOUT RURAL LIFE

South Carolina residents can learn where their food and fiber come from, as well as enjoy the sights and sounds of local art and music when the Clemson Cooperative Extension Service's 2021 Ag + Art Tour kicks off May 29.

Will Culler, tour director and member of the Clemson Extension Agribusiness Team, said the free self-guided tour gives people an excellent opportunity to see first-hand where food comes from, watch artists in action and purchase their works, enjoy the melodies of local musicians and learn more about rural life.

"This tour began in 2012 as a way for people to learn more about local agriculture and local artisans," Culler said. "We work with volunteers from a diverse spectrum of organizations in each county to design a tour that truly reflects local flavors. We encourage everyone to plan a tour of some of our state's best homegrown and handmade experiences."

Examples of artisans include painters, potters, weavers, quilters, acoustic musicians, artisan bakers, value-added producers, and more. While the tour is free, there may be charges to purchase food, beverages, and farmer's and artisan's products, as well as participate in some activities. All state and local regulations regarding COVID-19 will be followed.

Eleven counties are included in this year's event. The self-guided tours take place from 10 a.m. to 4 p.m. on Saturdays, and from 1–5 p.m. on Sundays. Tour dates, counties and contact information are:

MAY 29 - 30

Colleton County

Kristin Mumford, scartisanscenter@gmail.com

JUNE 5 - 6

Charleston County

 $Missy\ Farkouh, \underline{the goatery at kiawahriver@gmail.com}$

Kershaw County

Suzi Sale, ssale@camdensc.org

Lancaster County

Cherry Doster, cmstevens@comporium.net

Lexington County

Vickie Davis, vickie@lakemurraycountry.com

York County - East

Melanie Cooper, mcooper@yorkcountyarts.org

JUNE 12 - 13

Newberry County

Michelle Long, michelle@newberrycounty.org

Richland County

John Newman, JMNPlanning@outlook.com

York County - West

Melanie Cooper, mcooper@yorkcountyarts.org

JUNE 19 - 20

Fairfield County

Brad Hoffman, gypsywindfarms@gmail.com

JUNE 26 - 27

Chester County

Courtney Lee, ccl@g.clemson.edu

Chesterfield County

 $Darron\ Kirkley, \underline{chesterfieldcotourism@outlook.com}$

The tour takes place rain or shine, Culler said, adding sites may close if there is a threat of severe weather as the safety of visitors, farmers and artisans is the first priority. Participants are discouraged from bringing dogs as the tour sites are working farms and dogs can present food safety and livestock challenges. Service animals are allowed as needed.

For more information, go to <u>clemson.edu/</u> <u>extension/agandarttour/index.html.</u>

TEACHING CONSUMERS ABOUT FEED SAFETY DURING NATIONAL PET MONTH

BY EVA MOORE

May is National Pet Month, and to mark the occasion, the South Carolina Department of Agriculture created a month-long social media campaign to spotlight the department's Feed Safety program.

Using eye-catching graphics and photos of Feed Safety employees with their pets, we have been educating the public about the program's mission and duties.

SCDA is responsible for ensuring that all commercial feed products manufactured or distributed in South Carolina are safe and nutritious. Among the facts we're highlighting in our campaign:

- Our Feed Safety Program registers more than 20,000 animal food products annually. The registration process includes a review of the label to make sure it has all the required information and that the marketing claims are truthful and not misleading to the consumer.
- Our Feed Safety Program conducts about 500 inspections per year at firms in the state that manufacture or distribute commercial animal feed products.
- The program collects and tests more than 1,000 samples of animal feed each year. When samples are out of compliance, we work with the store & manufacturer to stop distribution until they can be properly re-labeled or disposed of.

SPRING BLOOM CAN REVEAL AGGRESSIVE INVASIVE WEED

BY CLEMSON UNIVERSITY

It's been hiding all winter, but now cogongrass is about to show its ugly face.

Its springtime bloom will give South Carolinians a chance to identity and eliminate it before the invasive weed continues to wreck native ecology as well as farmers' pastures, fields, and forests.

"The bloom stage is its most easily identifiable period," said Steve Compton, an environmental health manager with the Department of Plant Industry (DPI) in Clemson University's regulatory division. "Cogongrass is very difficult to destroy and

attempts to do so can wind up spreading it further, so we ask that the public alert us to its presence so that we can effectively eliminate it."

It is an aggressive weed that can form dense stands over large areas and choke out native plants. DPI is charged with the eradication of this plant and has treated all reported infestations, but new sites are found each year.

Cogongrass spreads both through small seeds and by creeping rootstalks called rhizomes, making it especially difficult to destroy. Trying to plow it under is likely just to spread its rhizomes even further.

"We take special precautions to make certain that when we find it, we eradicate it," Compton said.

"We ask that if a possible cogongrass population is found, landowners shouldn't disturb the plants. If you suspect you have found cogongrass, please contact us.

DPI has a Web page specifically for cogongrass with a link to an online reporting tool that can be found at clemson.

edu/invasives. You can also reach them by email at invasives@clemson.edu or by calling 864-646-2140.

Cogongrass can virtually eliminate indigenous plants that provide food and shelter for birds, animals, and insects. It has a murderous ability to release chemicals into the earth that will destroy desirable native vegetation and, if allowed, form large monocultures.

Aside from the people whose land it invades, cogongrass has no natural enemies in South Carolina. It is not a food for animals nor insects.

Native to Asia, Africa, and Australia, cogongrass is considered to be one of the 10 worst weeds in the world. It first was found in South Carolina in 1987 in Hampton County, where it still is active today.

Across the South, some surveys have shown it is as pervasive as kudzu. The pest has an especially tight foothold in the southernmost states in the Southeast, from Louisiana to Florida.

Cogongrass is also a fire hazard, especially when its leaves turn brown in the winter. "It's a very hot-burning plant," Compton said.

Cogongrass has been identified in 13 of South Carolina's 46 counties, seven of which are now free of the pest. Known sites remain in six counties: Allendale, Beaufort, Charleston, Florence, Hampton, and Williamsburg.

"Alert citizens play a very important part in keeping us safe," Compton said. "This is a plant we really wish to eliminate from our state."
