## \$40 MILLION FUND WILL SUPPORT SOUTH CAROLINA AGRIBUSINESSES, EXPAND OPPORTUNITIES FOR FARMERS

BY SCDA

COLUMBIA – The South Carolina Department of Agriculture is pleased to announce the Growing Agribusiness Fund, a new incentive program for South Carolina agribusinesses.

The South Carolina General Assembly appropriated \$40 million to launch the initiative, which will help existing South Carolina businesses engaged in the processing, packaging, manufacturing, distribution, storage, and transportation of agricultural products, in turn providing more markets for agricultural producers.

“This fund will be significant in opening up new opportunities for South Carolina farmers and agribusinesses,” said Commissioner of Agriculture Hugh Weathers. “I applaud the General Assembly for investing in the future of agriculture in our state in such a meaningful way.”

According to a 2022 study by Darla Moore School of Business research economist Joey Von Nessen, South Carolina currently imports \$11.7 billion in agribusiness products annually from outside the state. If this demand were captured by in-state operations, it would increase the total value of agribusiness by 23 percent. Being able to keep production and packaging at home helps bolster revenue, capital investment and jobs in South Carolina.

- Helping an existing packaging business open a second facility to produce a new line of sustainable food packaging

Examples of potential projects could include:

- Increasing the capacity of a vegetable canning operation with additional equipment
- Expanding an in-state seafood processor to capture more local seafood production
- Modernizing a poultry processing plant to improve efficiency, in turn increasing demand for locally grown feed and creating opportunities for poultry growers

Agribusinesses that are considering expanding and investing at least \$3 million in their current location or establishing an additional location in South Carolina are encouraged to contact the South Carolina Department of Agriculture to discuss their project and whether they qualify for the Growing Agribusiness Fund or another program.

Agribusinesses in Tier 3 and 4 counties (i.e., counties designated by the state Department of Revenue as having higher unemployment and lower income) and those that anticipate creating or consuming more agricultural products grown in South Carolina are highly encouraged to apply.

More information about the Growing Agribusiness Fund and other incentives for doing business in South Carolina can be found at [scagribusiness.com](http://scagribusiness.com).

## REWARDS FOR BUYING LOCAL

As I write this, farmers across the state are hustling to harvest corn before Hurricane Idalia blows through. The uncertainty of fall weather in hurricane country always seems to be with us, but it's been a good growing season for row crops. Farmers will be keeping one eye on the forecast and the other on the field.

We talk a lot at our department about buying local. But there are some tangible ways in which buying local is good for business. The state Agricultural Tax Credit is one great example — and a timely one. The credit is intended to reward existing companies for buying more agricultural products grown in South Carolina.

If your business buys South Carolina agricultural products, it could pay off at tax time. The state provides a possible income tax credit or withholding tax credit to agribusinesses or agricultural packaging operations that increase their purchases of products certified as grown in South Carolina by our agency.

To be eligible for this credit, a company must have a base year in which the company purchases at least \$100,000 of agricultural products that have been certified as grown in South Carolina by the South Carolina Department of Agriculture, and

then must increase the number of agricultural units purchased in the following year by at least 15% over the base-year. It's important to note that this doesn't have anything to do with our Certified South Carolina program; the products simply have to be grown here.

Eligible companies may claim an income tax credit or a credit against employee withholding. The South Carolina Coordinating Council for Economic Development actually makes the approval. An individual taxpayer cannot be awarded a credit in excess of \$100,000 during any calendar year, and the maximum amount of tax credits allowed to all qualifying taxpayers cannot exceed \$2 million.

The application deadline is September 30. For more information, please visit [scagribusiness.com/agricultural-tax-credit](http://scagribusiness.com/agricultural-tax-credit). You can also contact Norris Thigpen, Director of Agribusiness Development at the South Carolina Department of Agriculture, at [nthigpen@scda.sc.gov](mailto:nthigpen@scda.sc.gov).

There are many ways in which South Carolina helps agribusinesses grow, diversify, and hire more people. The new \$40 million Growing Agribusiness Fund — which you can read about elsewhere on this page — is another such effort.

## UPCOMING EVENTS

### Hive Tour & Honey Tasting with Beyond Bees

September 13, 20, 27, October 4 & 11 • 10 am – 12 pm  
Hive + Honey / Tour & Tasting is a fully immersive, 2.5-hour experience hosted at the Ivy Place farm. Gear up in bee suits and enter the world of bees guided by our knowledgeable beekeepers. Enjoy sampling regional honeys afterward in a peaceful farmstead setting. \$89 per person plus taxes and fees. 2.5 hours, ages 18+. We will provide bee suits, honey for tasting, water, cheese, crackers, nuts.

**The Ivy Place**  
8525 Van Wyck Road, Lancaster

704-650-2412

Tickets: [beyondbees.org/?fbclid=IwAR3S\\_CODnBm-qBclKag352-srues-nlsc9Xf9CSzmvHqzT5bd4FvdEcSZU](https://www.beyondbees.org/?fbclid=IwAR3S_CODnBm-qBclKag352-srues-nlsc9Xf9CSzmvHqzT5bd4FvdEcSZU)

### Mushroom Mountain Farm Tour

September 14 • 11 am – 12:30 pm  
Tours of Mushroom Mountain include an introduction to fungal ecology and life cycles, laboratory tour and research overviews, tour of the fruiting room, and if there is anything fruiting on the trail, you will get to experience it. Many aspects of mushrooms, including medicinal properties, cooking, and mycoremediation to soil creation will be discussed along the way! An experience that will last a lifetime for all ages!

## The South Carolina Market Bulletin

(ISSN 0744-3986)

The *Market Bulletin* is published on the first and third Thursday of each month by the SC Department of Agriculture, Wade Hampton Building, Columbia, SC 29201. Periodicals postage paid at Columbia, SC 29201.

Postmaster, send address changes to:  
SC Market Bulletin, PO Box 11280, Columbia, SC 29211

### POLICIES FOR ADVERTISING

For our full policies, please visit:  
[agriculture.sc.gov/market-bulletin-policies](https://www.agriculture.sc.gov/market-bulletin-policies)

Only ads pertaining to the production of agricultural products and related items are published. Ads are accepted for South Carolina items, even if the seller lives out of state, provided the item is in state at the time the ad is published and at the time of sale.

Ads are published free of charge and in good faith. The *Market Bulletin* reserves the right to edit and verify ads but assumes no responsibility for their content.

Ads cannot be accepted from agents, dealers, or commercial businesses, including real estate. Sealed bids, legal notices, or consignment sales are not accepted.

### SUBMITTING ADS

No matter the submission method, submissions must include the advertiser's name, complete address with zip code and county, and phone number with area code. While we don't publish the address, we need this information for our records. Do not use all capital letters.

- **Online:** Go to [agriculture.sc.gov/market-bulletin](https://www.agriculture.sc.gov/market-bulletin). Select "Submit Market Bulletin Ad" and complete the form. If you include your email address, you will receive an automated reminder for a renewal.

- **Mail:** SC Market Bulletin, PO Box 11280, Columbia, SC 29211. You must use 8.5 × 11 inch paper.

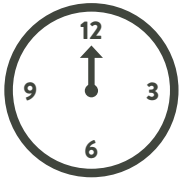

- **Email:** Send ads to [marketbulletin@scda.sc.gov](mailto:marketbulletin@scda.sc.gov). Put the words "Market Bulletin ad" in the subject line.

- **Fax:** 803-734-0659

The deadline for submitting ads and notices is noon on Tuesday of the week **before** the publication date.

## NEXT AD DEADLINE

SEPTEMBER 12 • 12:00 PM

## REMINDER TO ADVERTISERS

Ads are due by noon (12 pm) on the Tuesday after the latest published issue. Any ads received after the deadline will be considered for a subsequent issue.

**SAVE THE DATE**

Mark your calendars for the third annual Certified SC Showcase, a networking event and celebration of Certified South Carolina flavors and innovations. The March 21, 2024 Showcase provides an opportunity for buyers and producers to meet face-to-face, with an emphasis on the state's abundant produce, specialty food products, and marketing programs. Included is a trade show featuring SC farmers and producers, innovative educational sessions focused on market development/industry trends, and ample networking opportunities. Full agenda, hotel, and registration will be available in 2024 at [agriculture.sc.gov/showcase](http://agriculture.sc.gov/showcase).

**TWO SOUTH CAROLINA HORSES DIE FROM MOSQUITO-BORN DISEASE**

BY JONATHAN VEIT, CLEMSON UNIVERSITY

Eastern Equine Encephalitis (EEE) has resulted in the deaths of two South Carolina horses, according to State Veterinarian Michael J. Neault, Director of Clemson Livestock Poultry Health.

The National Veterinary Services Laboratories confirmed the diagnosis on Monday, August 21, 2023.

One horse was a two-year-old quarter horse gelding in Sumter County that was diagnosed with the disease at necropsy. The second was a five-year-old quarter horse mare in Lee County that was euthanized.

They are the first known cases of the summer. Another case was confirmed in a horse in Berkeley County in mid-January.

Neault reminded horse owners to work with their veterinarian to create an appropriate vaccination schedule to protect their animals from EEE, West Nile virus (WNV) and rabies.

“We had some heavy rains in areas across the state over the last month which means that mosquito populations can be extremely high. It is always important for horse owners to stay on top of equine vaccination schedules, but it is essential now considering the rain that we’ve had,” Neault said.

Borne by mosquitoes, these diseases have a very high mortality rate in infected, unvaccinated horses — between 30 and 40 percent for West Nile and 90 percent for EEE. However, widespread vaccination has kept the number of cases comparatively low in South Carolina compared to nearby states.

Likewise, mosquito control is an important precaution. Both EEE and West Nile Virus are maintained in nature through a cycle involving the freshwater swamp mosquito, *Culiseta melanura*, commonly known as the black-tailed mosquito.

The EEE and WNV viruses are mosquito-borne and fast-acting. Symptoms of EEE in horses usually develop from two to five days after exposure. The symptoms include stumbling, circling, head pressing, depression or apprehension, weakness of legs, partial paralysis, the inability to stand, muscle twitching or death.

In addition to EEE and WNV, other neurologic diseases, including rabies and EHV-1, can infect horses. Any livestock that display neurologic symptoms — stumbling, circling, head pressing, depression or apprehension — must be reported to the state veterinarian at 803-788-2260 within 48 hours, according to state law.

A list of reportable diseases, along with other resources, is published on the LPH website at [clemson.edu/public/lph/ahp/reportable-diseases](http://clemson.edu/public/lph/ahp/reportable-diseases).

# CLEMSON RESEARCHERS PROVIDE INFORMATION TO HELP KEEP CORN TOP COMMODITY IN SOUTH CAROLINA

BY DENISE ATTAWAY, CLEMSON UNIVERSITY

South Carolina corn acreage is up from 2022 and Clemson Extension specialists offer tips such as checking for nematodes, controlling pests and weeds, and properly managing inputs to help ensure corn remains one of the state's most lucrative crops.

Corn acreage planted in South Carolina in 2023 was 390,000 acres, up from 320,000 acres planted in 2022. The USDA Crop Production Report released Aug. 11 shows South Carolina farmers expect to produce 51.1 million bushels, up 40% from 2022, and make it on 370,000 acres with a 138 bushel per acre average yield.

To help South Carolina growers learn how to keep corn a top commodity, the Clemson Cooperative Extension Service held the 2023 Corn Field Day at the Edisto Research and Education Center (REC) in Blackville, South Carolina. Topics included a discussion about double-cropping corn and soybeans. In this project, led by Michael Plumblee, Clemson Extension corn and soybean specialist, he and Bennett Harrelson, Clemson doctoral student, are looking at every aspect of this system to generate a set of best management practices. One topic is to determine if using this system leads to issues with increased plant parasitic nematodes.

"Fewer nematodes were found during the fall sampling, said Plumblee, field day coordinator. "So, the nematicide is working, but we're not seeing a huge impact in corn yields."

Variety selection in soybean is critical, Harrelson said. In a double crop corn/soybean nematicide trial, Clemson researchers are studying a shorter season (109 RM) corn hybrid treated with insecticide/nematicide Counter 20G at 6.5 pounds/acre and the same corn hybrid not treated. Soybean following corn includes varieties with root-knot nematode (RKN)-resistance and RKN-susceptibility, both treated with AgLogic 15C at 5 pounds per acre. Also included in the study are plots of the same varieties not treated.

"From this research, we hope to determine what is profitable and sustainable," Harrelson said.

This research is funded by the South Carolina Soybean Board.

"We're seeing a lot of damage in corn related to Columbia lance nematodes," said John Mueller, plant pathologist. "Damage resulting from early season infections can lead to yield losses."

Nematodes are non-segmented worms typically 1/500 of an inch in diameter and 1/20 of an inch in length. The most common species are Columbia lance nematode, lesion nematode, Southern root-knot nematode, sting nematode and stubby root nematode. Columbia lance nematodes are causing the most problems this year.

Symptoms of possible nematode damage include areas of corn fields that are a lighter green than the

rest of the field or areas where plants are noticeably stunted. To determine if nematodes are part of the problem, Mueller advises growers to dig up the roots and compare the roots of healthy plants to roots of damaged plants. Roots of nematode-infected corn plants may exhibit small galls. More commonly, infected roots have very stubby side roots which are typically swollen.

Harvest is a good time to check for nematodes. Growers can work with their local county agent to submit samples to the Clemson University Nematode Assay Laboratory. Additional

attention to include the brown stink bug, green stink bug and southern green stink bug.

"Stink bug is a major economic pest of corn," said Tim Bryant, assistant coordinator for the Clemson IPM program. "Scouting is important."

To help manage pests, Clemson researchers and researchers from other Land Grant Institutions developed the MyIPM for Row Crops app. This is a free app available for Android smartphones in the Google Play Store and for iPhones in the Apple Store.

During the 2023 Clemson Extension Corn Field Day, Michael Marshall, Clemson Extension weed scientist, talks about herbicides being studied for use in South Carolina.

For insect pests updates or other IPM questions, growers also can read the Clemson IPM blog – [blogs.clemson.edu/ipm/](https://blogs.clemson.edu/ipm/), as well as refer to the 2023 South Carolina Pest Management Handbook available at [bit.ly/2023PestMgtHandbook](https://bit.ly/2023PestMgtHandbook).

## CORN FERTILITY UPDATE

Fertilizers claim a large portion of input costs for growing crops and Clemson University nutrient management specialist Bhupinder Farmaha said precise input management is important. In a corn fertility update, Farmaha said proper nitrogen management can be ensured by periodic soil

information about nematodes and other crop-related issues also is available from the Crop Protection Network, [cropprotectionnetwork.org](https://cropprotectionnetwork.org).

Excessive rain this year has resulted in more herbicides being applied to corn. Michael Marshall, Clemson Extension weed scientist, is evaluating new corn herbicides for South Carolina growers. Herbicides evaluated in this study included Storen, Halex GT, Callisto, Anthem Maxx, Harness Max, Capreno and Kyro.

Marshall said weeds to look out for include annual morning glories, which "are an enemy of corn, especially at harvest time," and Texas Panicum, which "is not a problem in soybeans but can be a major problem in corn later in the season."

As for insect pests, Bt (*Bacillus thuringiensis*) corn can help control some insect pests. Francis Reay-Jones, Clemson entomologist and Integrated Pest Management (IPM) program coordinator housed at the Pee Dee REC near Florence, South Carolina, said since its commercialization in 1996, the Bt corn technology has helped reduce and manage pests including corn earworm.

The corn earworm, also known as the bollworm, attacks both corn and cotton. Selection for resistance to corn earworm in Bt corn is leading to resistance issues in Bt cotton. Farmers may be dealing with this problem for some time.

"We are years away from any new Bt trait in corn and cotton," Reay-Jones said. "However, resistance development can be delayed by planting the required non-Bt corn refuge on each farm."

Other corn insect pests growers should pay

testing, liming soils, following Clemson's fertilizer recommendations and diversifying crop rotations with cover crops. If animal manure is used as fertilizer, it should be tested before deciding on application rates. Farm management history should be considered to maximize benefits and minimize minimal environmental concerns.

"It's not how much manure to apply, but how to manage it," Farmaha said. "When animal manure is applied to a field, adjust inorganic fertilizer nitrogen rates for the nitrogen supplied by the manure. Because animal waste is highly variable in nutrient content such as in, nitrogen, phosphorus and potassium, laboratory analyses are needed to determine nutritive value."

Soil tests can help determine fertilizer amounts needed. Soil testing and manure analyses are available from the Clemson Regulatory Services Agricultural Service Laboratory, [bit.ly/CU\\_AgServiceLab](https://bit.ly/CU_AgServiceLab).

In addition to these topics, field day participants also learned about services offered by the Clemson Extension Agronomic Crops Team. Jay Crouch, agronomic crop agent in the Newberry County office, said this team of Clemson Extension agents, researchers and specialists can provide information related to crop production, pest management, harvesting and post-harvesting processes for commodities such as soybeans, corn and tobacco. The South Carolina Crops Blog also provides producers with the latest pest, weather, disease and variety trial information, and posts about news and updates from workshops and Field Days.

Field day participants also were given updates on corn official variety trials, hybrid trials and using fungicides to control foliar diseases.

# S.C. SENATE PRESIDENT THOMAS ALEXANDER AND SEED COMPANY FOUNDER DANNY MIXON HONORED FOR AGRICULTURE ADVOCACY

BY SC ADVOCATES FOR AGRICULTURE

COLUMBIA – South Carolina Advocates for Agriculture named two Advocates of the Year for 2023 in honor of their service to the state’s agriculture industry.

The 15<sup>th</sup> Advocates of the Year Recognition Reception was held Thursday, Aug. 17, at the Phillips Market Center at the South Carolina State Farmers Market in West Columbia.

**S.C. Senate President Thomas Alexander**, a native South Carolinian and Oconee County businessman, has been committed to agriculture throughout his 29 years in the Senate. He supports South Carolina farmers, agribusinesses and rural communities in his work at the State House.

**Danny Mixon**, who founded Mixon Seed 50 years ago and remains part of its leadership team, has been instrumental in developing the state’s seed industry. His work to preserve and promote South Carolina agriculture is a model for others.

“It’s very fitting to recognize people who have done so much for South Carolina agriculture,” said Commissioner of Agriculture Hugh Weathers, who serves as an advisor to the Advocates for Agriculture board. “On behalf of the state’s farmers and the more than 250,000 people whose jobs are supported by agribusiness, I thank these two men for their service.”

“Senator Alexander has always welcomed feedback

from agribusiness leaders as to needs within the industry and has always exhausted every effort to provide support when and where needed,” said Ronnie Summers, president of Advocates for Agriculture. “Danny Mixon has been a leader in South Carolina agribusiness for well over 50 years and is still making a major impact on the state’s number one industry. Just recently, for example, Danny was instrumental in helping the state land a peanut processor. These two leaders are without question deserving Advocates of the Year!”

Founded in 2005, the nonprofit South Carolina Advocates for Agriculture helps promote the state’s agricultural products and overall agriculture industry.

# USDA ANNOUNCES SPECIALTY CROP BLOCK GRANT PROGRAM FUNDING AWARDED TO SOUTH CAROLINA

BY USDA

WASHINGTON, August 23, 2023—The U.S. Department of Agriculture’s (USDA) Agricultural Marketing Service (AMS) awarded over \$601,000 in Fiscal Year 2023 Specialty Crop Block Grant Program (SCBGP) funding to South Carolina. With this grant, the South Carolina Department of Agriculture (SCDA) will fund projects that enhance the competitiveness of specialty crop products and create new market opportunities for the state’s specialty crop producers.

“With this year’s Specialty Crop Block Grant funding, South Carolina is investing in innovative projects that will help address the needs of specialty crop producers within the region,” said USDA Under Secretary for Marketing and Regulatory Programs Jenny Lester Moffitt. “The funded projects will also further USDA’s efforts to ensure U.S. specialty crop products remain competitive in markets across the nation and abroad.”

Across the state, 15 projects will be funded by the 2023 Specialty Crop Block Grant Program, including nine Clemson University research projects to improve the production of peaches, eggplants, wine grapes, pecans, chickpeas, and

watermelons as well as to initiate the preservation of heirloom vegetable seeds for South Carolina growers. Freshlist LLC also will use SCBGP funding to enhance specialty crop production and distribution for SC growers through data visualization. In addition, FoodShare Greenville will use funding to expand its distribution capacity to further support growers and consumers in the upstate. Through SCBGP funds, SC Specialty Crop Growers Association will offer cost-share reimbursement opportunities to specialty crop growers to offset packaging costs and will offer growers in-person training to improve specialty crop marketability through direct wholesale. Finally, SCDA will be encouraging consumers to visit any of the three state farmers markets in Columbia, Florence, and Greenville through multiple specialty crop-focused events.

“The Specialty Crop Block Grant Program helps South Carolina farmers thrive,” said South Carolina Commissioner of Agriculture Hugh Weathers. “These grants help specialty crop growers reach new customers, expand to bigger markets, and grow more local crops more successfully. It’s a win-win for consumers and agriculture.”

The funding to South Carolina is part of a total of \$72.9 million in non-competitive FY 2023 SCBGP funding awarded to 54 states, territories, and the District of Columbia. The SCBGP funding supports farmers growing specialty crops, including fruits, vegetables, tree nuts, and nursery crops. USDA’s support will strengthen U.S. specialty crop production and markets, ensuring an abundant, affordable supply of highly nutritious fruits, vegetables, and other specialty crops, which are vital to the health and well-being of all Americans.

The funding for the SCBGP grants is authorized by the 2018 Farm Bill and FY2023 funding is awarded for a three-year period beginning Sept. 30, 2023. Since 2006, USDA has invested over \$1 billion through the SCBGP to fund nearly 12,000 projects that have increased the long-term successes of producers and enhanced marketing opportunities for U.S. specialty crops products.

More information about these awards is available on this webpage: [ams.usda.gov/sites/default/files/media/SCBGPDescriptionofFunds2023.pdf](https://ams.usda.gov/sites/default/files/media/SCBGPDescriptionofFunds2023.pdf).
