YELLOW-LEGGED HORNET DETECTED

CLEMSON OFFICIALS ASK PUBLIC TO REPORT LARGE HORNETS

BY CLEMSON UNIVERSITY

An invasive yellowlegged hornet was trapped in Jasper County, according to Clemson University officials tasked with protecting the state's beekeeping industry.

The hornet was captured Nov. 9, and the finding was confirmed by the USDA's Animal and Plant Health Inspection Service (APHIS) Nov. 16. This is the first

known detection of the hornet (Vespa velutina) in South Carolina, after Georgia officials reported a Savannah-area sighting in August.

While the yellow-legged hornet — not to be confused with the northern giant hornet — is no more harmful to humans than other hornets, it can have a devastating impact on both managed and wild bees.

Clemson officials are urging anyone who suspects they have spotted a yellow-legged hornet to report their findings to <u>clemson.edu/public/regulatory/</u> plant-industry/invasive/ylh.html.

"South Carolina has a robust beekeeping industry and an enthusiastic beekeeping hobbyist community. Bees are also essential to the state's agriculture industry and the safety of our food supply as pollinators. This is why it is so important that South Carolina citizens remain vigilant and report sightings," said Steven Long, assistant director, Clemson Department of Plant Industry (DPI).

in the state, hornets know no borders and the Lowcountry's proximity to Savannah is giving officials cause for concern. As a result, Clemson DPI will be enhancing its current trapping efforts in the area, will work with federal officials to confirm suspected specimens and will respond to active hornet colonies if they are located.

"The yellow-legged hornet is a predatory insect that has been reported to attack western honeybee colonies and has become a serious pest of beekeeping operations where it has been introduced," said Ben Powell, who directs Clemson Cooperative Extension's Apiary and Pollinator program. "Establishment of this exotic pest in the U.S. would pose a significant threat to our already embattled beekeeping enterprises."

"USDA applauds the swift response from Clemson DPI to the detection of a yellow-legged hornet in South Carolina," said Dr. Mark Davidson, Deputy Administrator of APHIS' Plant Protection and Quarantine Program. "APHIS has supported Clemson DPI by providing technical and financial assistance since the initial detection of this pest was first found in Savannah, Georgia. APHIS is committed to working with our state partners on the eradication of this pest. The public also play a critical role in helping to eradicate this pest by being vigilant and reporting any signs of the yellow-legged hornet."

COMMISSIONER'S CORNER

HUGH E. WEATHERS

SOUTH CAROLINA COMMISSIONER OF AGRICULTURE

ON THE ROAD AND PAVING THE ROAD

ecember is off to a busy start. Last week was the South Carolina Farm Bureau annual meeting at Myrtle Beach. This week, marketing staff and I are on the road at the New York Produce Show. Connecting with regional and national buyers is key to supporting and expanding the produce industry in the Palmetto state. The New York and northeast US-area market in particular is crucially important for many South Carolina producers, and we maintain a presence at this show each year. And we are well-positioned because, over the past few years, retailers have been increasingly interested in sourcing from the East Coast. Through our Market Development and Retail Merchandising efforts, we connect retailers with producers and provide Certified

SUSTA, the Southern **United States Trade** Association, which is holding its fall meeting in Charleston. SUSTA paves the road for small businesses in the Southern **United States to promote** value-added U.S. food and agricultural products to foreign markets. SUSTA-eligible products include fresh produce; beer, wine, and spirits; meat; dairy; horticulture; forest products; and specialty foods. The organization has some very helpful programs for local businesses, like **Export Readiness Training** and Cost Share grants for brand promotion. This meeting is more focused on the people who make SUSTA happen, though: the 15 Southern Departments of Agriculture. We'll be talking about the latest reports from the Foreign Agricultural Service, and hearing targeted market reports on a variety of regions including sub-Saharan Africa, Mexico, Canada, and Central America, as well as how to serve businesses in our region. We also get to show off two South Carolina agribusiness success stories: Lowcountry Oyster Co. and High Wire Distilling Co.

The South Carolina detection comes after DPI's Apiary Inspection Program — the regulatory agency charged with protecting the state's beekeeping industry — collaborated with the Clemson Cooperative Extension Apiculture and Pollinator Program to proactively monitor Lowcountry locations through an elaborate trapping system.

While the detection does not necessarily indicate that yellow-legged hornets have established habitat The yellow-legged hornet is native to Southeast Asia and has established itself in most of Europe and areas of the Middle East and Asia. The hornet builds egg-shaped paper nests above ground and often in trees. The nest can be large and house an average of 6,000 workers. This exotic hornet may be confused with several native insects, including the cicada killer wasp, the bald-faced hornet, paper wasps, queen yellowjackets, wood wasps and robber flies, but is distinguished from these other stinging insects by its larger size. South Carolina branding materials to support our local producers.

We also pave the road. Mark your calendars for March 21, 2024, when we'll hold the next Certified SC Showcase. This is a homegrown version of events like the New York Produce Show—a trade show and educational and networking event at which we connect buyers with South Carolina growers and products.

New York is a fun place to visit during the Christmas season, but I'll be heading back to the great state of South Carolina soon for I wish everyone a Merry Christmas and a joyful holiday season. I'm looking forward to spending some time at home with my family—and then I'll be on the road once again in the New Year.

Hughenleathers

MARKET BULLETIN DECEMBER SCHEDULE

Please note: <u>There will only be one issue in December</u>.

Due to the holidays, the deadline schedule has been adjusted to the following:

December 19 Ad Deadline for the January 4, 2024 Issue

Ads must be received by noon (12 pm) on the deadline dates to be included.

Christmas Market on the Farm with Santa

December 16 • 11 am – 5 pm Join us at Marshall Farm and let us be a part of your next family holiday tradition! Marshall Farm

Sip n' Taste – The Holiday Edition

UPCOMING EVENTS

December 16 • 5 - 7 pm

We are offering an intimate ADULT ONLY outing to get into the holiday spirit in traditional German style! Come enjoy a warm mug of Glühweinmulled wine with spices-and nibble on traditional German Lebkuchen cookies to spice up your palate! Warm cider and traditional Vorspeisen—the German word for appetizers or starters—prepared specially for you will also be on the menu! One of John's fondest childhood memories is the Christkindlesmarkt-Christmas Market celebrated all over Germany during the 4 weeks of Advent before Christmas-that he got to experience growing up in Germany. At these markets, you can buy crafts and holiday decorations, listen to Christmas music, and enjoy Glühwein, Bratwurst, and many sweet treats. We are excited to share some of these family traditions with our community right here on the farm! \$65 investment includes: Entry for I person, Sip n' Taste Experience, and a Mini Christmas Tabletop to take home. **Five Blossoms Farm**

1121 Crossland Road, Clover 803-610-5809 facebook.com/fiveblossomsfarm

Colonial Christmas

December 16 • 5 - 7 pm

Join us for an evening of family fun. There will be music provided by a local choir. Food, drinks, and s'mores will be available for purchase in the tavern. Take a wagon ride and enjoy our story walk. Children can listen to a reading of the traditional favorite Christmas story, make a colonial toy, and help make ornaments for our "Christmas for the Critters" tree.

Winter Solstice Celebration

December 21 • 6 pm

Join us for a super fun and myco-centric Winter Solstice celebration at Mushroom Mountain! Our celebration will be led by Lizza the Elf, along with other Mushroom Mountain staff and will feature winter-themed refreshments, activities and a presentation about the mysterious lore of the Amanita Muscaria mushroom and how it has influenced celebrations all over the globe for centuries. Warning to parents: Santa Claus and mysterious, esoteric origin story will be discussed in this presentation. Hint: Santa is a mushroom! Bring your own pizza to cook in our mushroompizza oven! We will offer a warming fire (weather permitting), Yule-tide and mushroomy snacks, mushroom painting activities and a Yule Log celebration. This event is limited to 40 people. **Mushroom Mountain** 200 Finley Road, Easley sporeprints@gmail.com • 864-859-3080 facebook.com/MushroomMountainFarm

The Stable of Bethlehem

December 21 – 23 • 6 – 8 pm

Join us as we bring to life the humble beginnings of the birth of our Lord and Savior. Truly experience the wonder of this living nativity. Showings will begin at top of the hour. Please let us know if you or your church would like to participate. Famoda Farm Festivities & Events Grazers: Famoda Farm to Table.

Home for the Holidays

Through January 6 • 9 am – 2 pm Step back in time with us to the roaring twenties as we embellish the Magnolia House in the jewel tones of the 1920s for the holiday season. Our Magnolia House tour will spend time highlighting Norwood and Sara Hastie, who entertained lavishly during their 30 year ownership—including visits from presidents, first ladies, innovators and A-list celebrities of the time. Enjoy festive decor, winter treats at the Peacock Cafe, and the beauty of the wildlife and gardens. House tour tickets and garden admission available on-site and online. **Magnolia Plantation and Gardens 3550 Ashley River Road, Charleston** *magnoliaplantation.com*

Educational Farm Tours

Looking to learn about regenerative farming? Marissa Paykos, the brain power and visionary behind Whippoorwill Farms will take you up close and personal! For individuals and groups alike, if you're looking for an education in regenerative farming practices & cultivating biodiversity through farming this tour is for you. Marissa will extensively cover how they began farming back in 2015, how the big farm came to be and what the land was like when they started developing it back in 2019. You'll see how far they've come and what their hopes and dreams are for the future and how they work to achieve progress towards those goals every day. Tours begin at a minimum of \$225. For groups over 15 people, the Farm Tour is bookable at \$15/person. Tours are best for ages 7+. For more information, to inquire about availability, or to book your farm tour, contact us. CLEMSON, AUSTRALIAN SCIENTISTS UNITE TO COMBAT FUSARIUM WILT IN COTTON

BY DENISE ATTAWAY, CLEMSON UNIVERSITY

Cotton farmers worldwide have long witnessed Fusarium wilt strip leaves from their crops, leaving plants with bare stems withering away in the fields.

Scientists from Clemson University and Australia are collaborating to create Fusarium-resistant germplasm for use in United States and Australian cotton breeding programs.

Christopher Saski, a geneticist in Clemson's Plant and Environmental Sciences Department, is working with Warwick Stiller, a plant breeder in Australia's Commonwealth Scientific and Industrial Research Organization (CSIRO), to develop germplasm to combat the FOV4 (Fusarium Race 4) strain in Upland cotton.

"Fusarium wilt is a primary disease affecting production in many growing areas in the United States and Australia, both of which rely on exports to sustain their production systems," Saski said.

A soilborne pathogen causes the disease and can live in the soil for many years. Chemical controls and cultural practices are ineffective, making geneticresistant plants a viable solution for controlling FOV4.

"We want to gain a deeper understanding of plant defense mechanisms and identify potential targets for genetic manipulation so that we can release varieties with durable genetic resistance much faster," Saski said.

New breeding tools will help determine if recently discovered genes that provide resistance to FOV4 in United States cotton can also provide resistance

in Australian cotton.

"We will use cutting-edge research and collaboration to empower breeders with the tools

and knowledge they need to optimize cotton production, thus helping secure the future of this vital crop," Saski said.

Stiller said cross-disciplinary collaboration is essential to opening discussion and sharing methodologies, technology and experience across research groups.

"Although significant progress can be made, no single research group can solve the disease challenges across the global cotton industry," Stiller said. "Through the dedicated

efforts of two leading laboratories, the similarities and differences of resistance to FOV4 and the Australian biotype of FOV will be identified.

"The outcomes will benefit Australian and U.S. cotton growers by sharing information and genetic resources so both countries can continue to develop cultivars with increased resistance to these diseases."

The severity of Fusarium wilt is increasing because of climate change caused by weather fluctuations.

"Fusarium wilt is a serious threat to cotton production in the United States and abroad," said

Symptoms of FOV4 on Upland cotton include dark and continuous vascular staining on the upper tap roots and lower stems of plants.

FFAR Chief Scientific Officer Angela Records. "This insidious pathogen strips leaves from crops and jeopardizes farmers' profit. Cotton farmers need access to resistant plants as soon as possible. This

research is helping to speed relief by developing tools to better understand the fungus and aid in faster breeding to combat it."

This project is funded by a \$750,000 grant from the Foundation for Food & Agriculture Research (FFAR) as a Next Generation Crops research project, research conducted in part to improve crops' resilience to climate change. Matching funds come from Clemson University, Cotton Incorporated and CSIRO for a total \$1,922,439 investment.

SYMPTOMS OF FOV4

Symptoms of FOV4 on Upland cotton include dark and continuous vascular staining on roots. As the fungus continues to grow, more tissues decay. In severely infected plants, damage is seen as stunting, wilting and death; while other infected plants may only be stunted and still survive the growing season. To monitor for Fusarium wilt, walk the fields, pull random and symptomatic plants and, then, cut roots and inspect for taproot staining.

THE FARM-GROWN CHRISTMAS TREE SUPPLY FOR 2023, AND A 2022 SEASON RECAP

BY THE NATIONAL CHRISTMAS TREE ASSOCIATION

The supply of farm-grown trees will remain tight again for the 2023 Christmas season. The National Christmas Tree Association, the national association of Christmas tree growers, advises consumers to follow these recommendations:

- Shop early to have the best choice. Due to their popularity, in some parts of the US chooseand-cut Christmas tree farms sell their available trees If you plan to shop at a tree farm shop early in the season after Thanksgiving. Shopping early in the season is a good idea wherever you plan to shop to have the most options to choose among.
- You will be able to purchase a tree. Supplies are tight and some locations will sell out early, but there are enough real farm-grown Christmas trees for everyone who wants one to get one. Supplies of real farm-grown trees have been tight since 2016, but each year shoppers have been able to find a tree.
- Be flexible. Because supplies are tight you may

need to look in different places to find a real tree. You should also be open to trying different types of trees. There are many beautiful varieties of Christmas trees, there will be one that is just right for you and your family.

2022 SEASON RECAP

NCTA conducts a survey of consumers each year in January to monitor important consumer Christmas tree purchasing trends that impact the industry including; the percentage of consumers purchasing real Christmas trees, where they purchased their trees, the price they paid and demographic information on real Christmas tree purchasers. The survey is taken by a 2,000-person sample that is balanced to represent the demographics of the US population. The results of the survey are used to project the total number of real trees purchased and calculate the median price paid by survey respondents who purchased a real tree. The 2022 survey results project 22.34 million real Christmas trees were purchased in 2022. The survey respondents who purchased a real tree reported paying a median price of \$80 for their tree in 2022. The average real Christmas tree buyer in 2022 was 42 years old, lived in a household of more than 3 people and owned a home. Real tree buyers reported they earned more income in 2022 than in 2021.

WHERE REAL FARM-GROWN CHRISTMAS TREES WERE PURCHASED IN 2022

MARKET BULLETIN

\$33.2 MILLION INVESTMENT IN SOUTH CAROLINA SUPPORTS NEW AND BETTER MARKET OPPORTUNITIES AND EXPANDS EXISTING ONES

USDA GRANTS WILL EXPAND MARKETS AND CREATE JOBS IN 37 STATES AND PUERTO RICO

U.S. Department of Agriculture (USDA) Secretary Tom Vilsack announced Nov. 27 that USDA is making investments that will expand markets for agricultural producers and strengthen American food and agriculture supply chains in 37 states as well as Puerto Rico.

"The Biden-Harris Administration is championing America's farmers and ranchers by helping to expand businesses, support more robust American supply chains and save jobs," Vilsack said. "Today's investments in agricultural producers and rural entrepreneurs will create better economic opportunities that spur competition and bolster food supply chains across the country. This will result in more affordable prices and choices for consumers, as well as more opportunities and revenue for farmers."

The announcement was made as part of the inaugural meeting of the new White House Council on Supply Chain Resilience which is part of President Biden's agenda to bring down costs for American families and increase investment in America's supply chains critical to economic and national security. The funding builds on prior investments made by USDA under President Biden's Investing in America agenda to increase competition, enhance independent meat and poultry and other diversified food processing capacity, strengthen local and regional food systems and expand domestic, innovative fertilizer production.

USDA is making investments in 185 projects worth nearly \$196 million to create new and better market opportunities for producers and entrepreneurs in Arizona, California, Colorado, Florida, Georgia, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, North Carolina, Oklahoma, Oregon, Pennsylvania, South Carolina, South Dakota, Tennessee, Texas, Vermont, Virginia, Washington, Wisconsin, Wyoming and Puerto Rico.

"South Carolina received over \$33.2 million to support 18 projects located throughout the state," said USDA Rural Development South Carolina State Director Dr. Saundra Glover. "These investments will support new and better market opportunities and expand existing opportunities for our rural farmers and ranchers."

For example, in South Carolina:

Agricultural Scientific, LLC will use a \$29.6 million loan through the Food Supply Chain Guaranteed Loan Program to help support the development of a large greenhouse in Hampton County, South Carolina. The funds will be used for Phase I, which is a 35-acre tomato greenhouse and processing facility. Rural Development is also investing funds through the Business and Industry program. • Split Creek Farms, LLC located in Anderson County, will use a \$250,000 Value-Added Producer Grant to provide working capital expenses associated with processing and marketing goat milk into cheeses for wholesale and to sell the raw milk into new markets. This project will create two new jobs and expand the customer base by 50 individuals and eight wholesale businesses.

BY USDA

transporting, and marketing Halal Quail Eggs throughout South Carolina. This project will create 30 jobs and save 20 jobs in the local area.

• Lowcountry Creamery LLC will use a \$250,000 Value-Added Producer Grant to expand the customer base and sales of the pasteurized and flavored milk throughout the regions of South Carolina. The grant funds and matching funds will be used to offset the cost of marketing, labor, supplies, delivery, and utilities.

Other South Carolina projects funded are:

- Edisto Honey LLC: This Rural Development investment will be used to increase sales and profits for locally produced raw honey and honey products. Specifically, grant funds will be used to offset the costs of supplies, distribution, and labor. The customer base and revenue will be increased by 10 percent.
- Milky Way Jersey Farm Inc. dba Milky Way: This Rural Development investment will be used to increase customer base for the pasteurized and flavored milk. Grant funds and matching funds will help offset the cost of labor, supplies, marketing, and distribution.
- Lowland Farms LLC: This Rural Development investment will be used to increase processing and marketing of locally produced carrots, beets, and greens. Grant funds and matching funds will be used to offset the cost of labor, marketing, delivery, and supplies. It is expected that this project will increase customer base by 50 percent.
- Colony Craft Bev Co. dba High Wire Distillery: This Rural Development investment will be used to cover working capital expenses associated with improving company marketing efforts and brand recognition, non-family labor, and to pay for operational expenses associated with spiritmaking and retail sales operations for their 100 percent rye whiskey. It is expected that this project will expand the customer base in different states.
- Seaside Grown LLC: This Rural Development investment will be used to provide market expansion of the Spicy Bloody Mary Mix drink. It is expected that this project will increase customer base by 80 percent and increase revenue by 60 percent. Grant funds and matching funds will be used to offset costs of supplies, labor, and marketing.
- The Sims Farms LLC: This Rural Development investment will be used to increase sales and marketing of locally produced organic vegetables. The Sims Farms LLC is a minority owned, 50 acre farm that has been in the family since 1876 and

- Barrier Island Oyster Company LLC: This Rural Development investment will be used to increase sales of locally grown premium single oysters. Barrier Island Oyster LLC will use the grant funds and matching funds to offset the cost of labor, storage, marketing and delivery. It is expected that this project will increase customer base by 50 percent and increase revenue by 30 percent.
- Grants Lowcountry Fungi LLC: This Rural Development investment will be used to increase sales and customer base for locally grown mushrooms. The Lowcountry Fungi LLC will use the grant funds to offset the cost of labor, supplies, marketing and transportation.
- Southern Oaks Jerseys Farm & Creamery LLC: This Rural Development investment will be used to increase processing and marketing of locally produced ice creams. Southern Oaks Jerseys Farm and Creamery LLC will use the grant funds to offset the cost of labor, supplies, marketing, and delivery. It is anticipated that this project will increase customer base by 67 percent and increase revenue by 33 percent.
- Hoss Farms Hodge LLC: This Rural Development investment will be used to increase marketing and selling of locally grown vegetables in Marion and Charleston counties. Grant funds will be used to offset the cost of labor, marketing and supplies. It is expected that this project will increase revenue by 30 percent and increase customer base by 50 percent.
- Cannon Ag Products LLC: 2 This Rural Development investment will be used to increase processing and marketing of locally produced and shelled lima beans. Cannon Ag Products LLC will use the grant funds and matching funds to offset the cost of shelling, labor, distribution, supplies, and marketing.

BACKGROUND

USDA and the Biden-Harris Administration are making these investments through six programs designed to create economic opportunities for people and businesses in rural areas.

Rural Business Development Grants assist with economic development planning and/or the financing or expansion of rural businesses by providing technical assistance and training for small rural businesses.

The Value Added Producer Grants Program helps farmers and ranchers venture into new markets by adding value to their bio-based products that will increase their revenue. Funds may be used to process or market these products. For example, an olive farmer may use funding to produce and market olive oil.

• Manchester Farms Inc. located in Richland County will use a \$250,000 Value-Added Producer Grant to cover working capital expenses associated with processing, storing, just recently was awarded the Century Farms Award. Grant funds and matching funds will be used to offset the cost of labor, supplies, and marketing. In addition, this project will increase customer base by 35 percent.

- Bulls Bay Enterprises Inc.: This Rural Development investment will be used to increase sales and marketing of locally grown clams. Specifically, grant funds will be used to offset costs of labor, packaging, distribution, and marketing.
- Keegan-Filion Farm Inc.: This Rural Development investment will be used to allow Keegan-Filion Farm Inc. to offset costs of processing, delivery, marketing, labor, and supplies of its beef products. It is anticipated that this project will expand customer base by 30 percent.
- Roblyn's Neck Trophy Club LLC: This Rural Development investment will be used to expand customer base for the locally produced grits and corn meal. Specifically, grant funds and matching funds will be used to offset the cost of labor, supplies, and marketing.

Business and Industry Loan Guarantees help improve rural economic health by increasing access to business capital, allowing commercial lenders, like banks and credit unions, to offer affordable financing to eligible rural businesses. This program was authorized by the Consolidated Farm and Rural Development Act.

The Food Supply Chain Guaranteed Loan Program supported investments in infrastructure for food processing, manufacturing, storage, transportation, wholesaling, aggregation and distribution to increase capacity and create a more resilient, diverse and secure U.S. food supply chain through the American Rescue Plan Act.

South Carolina Department of Agriculture

USDA EXTENDS APPLICATION DEADLINE FOR DISCRIMINATION FINANCIAL ASSISTANCE PROGRAM TO JANUARY 13

BY USDA

The U.S. Department of Agriculture is extending the deadline for the Discrimination Financial Assistance Program to January 13, 2024, to give eligible farmers, ranchers and forest landowners more time to apply for assistance. The original deadline was October 31, 2023.

This deadline extension is responsive to feedback from potential applicants, nongovernmental program administrators and community-based organizations working closely with USDA to inform and assist eligible individuals. The new deadline will allow more time to reach and help farmers, ranchers and forest landowners through direct, no-cost technical assistance and training sessions. The extension will also ensure everyone has adequate time to apply, including producers whose harvest season falls during the original application period.

"USDA knows it must earn the trust of the farmers, ranchers and forest landowners who are eligible for this program. That makes transparency in the administration of the Discrimination Financial Assistance Program crucial," said Agriculture Secretary Tom Vilsack. "In that spirit, after receiving feedback from organizations that have been supporting producers throughout the application process, we have made the decision to extend the deadline. We believe this is the appropriate action to take to ensure all eligible individuals wishing to apply are adequately informed about the program and have the opportunity to receive any necessary assistance."

Since the opening of the financial assistance application process on July 7, the Discrimination Financial Assistance Program team has embarked on a nationwide outreach campaign and quickly opened 30 local offices across 26 states. Regional administrators have held well over 600 virtual and in-person events across the country. Cooperators have also held dozens of virtual and in-person events to complement these efforts while also educating their specific networks. Advertising on digital, print and radio channels targeting potentially eligible individuals and rural communities has also been deployed. These efforts have successfully allowed program staff to reach many potential applicants and will be further increased with the new, extended deadline.

This program delivers on Section 22007 of the Inflation Reduction Act, which provides financial assistance for farmers, ranchers and forest landowners who experienced discrimination in USDA farm lending programs prior to January 2021. Congress provided a total of \$2.2 billion for this program. The amount of money awarded to individuals through this program will depend on the number of eligible applicants and the consequences of the discrimination. Eligible individuals have the option to apply online or by submitting paperbased forms via mail or in-person delivery to local program offices. Applicants are not required to retain an attorney and should take precautions to protect themselves from potential scams.

In addition to the application deadline change, the deadline to request records from USDA's Farm Service Agency for use in applications has been extended to Friday, Nov. 3, 2023. The application process was designed so that FSA records are not required, though relevant records may be attached to an application as additional evidence if they are available.

To learn more about the Discrimination Financial Assistance Program or receive assistance in English or Spanish, visit <u>22007apply.gov</u>, email <u>info@22007apply.gov</u> or contact the national call center at I-800-72I-0970 from 8 a.m. ET to 8 p.m. PT, every day except federal holidays. If you use sign language to communicate, you can use the 7II relay service to call. You may also email or contact the national call center if you have a disability and need another accommodation. Information about the program, resources, recent office openings and local events across the country is also available through a weekly e-newsletter.

The Rural Economic Development Loan and Grant Program provides funding for rural projects through local utility organizations. USDA provides zero-interest loans to local utilities which, in turn, lend the funding to local businesses to support projects that will create and keep jobs in rural areas.

Under the Biden-Harris Administration, USDA Rural Development provides loans, loan guarantees and grants to help expand economic opportunities, create jobs and improve the quality of life for millions of Americans in rural areas. This assistance supports infrastructure improvements; business development; housing; community facilities such as schools, public safety and health care; and high-speed internet access in rural, tribal and high-poverty areas. For more information, visit <u>rd.usda.gov.</u>

USDA is transforming America's food system with a greater focus on more resilient local and regional food production, fairer markets for all producers, ensuring access to safe, healthy and nutritious food in all communities, building new markets and streams of income for farmers and producers using climate-smart food and forestry practices, making historic investments in infrastructure and clean energy capabilities in rural America, and committing to equity across the Department by removing systemic barriers and building a workforce more representative of America. 2023 LEGAL NOTICE

NOMINATIONS FOR CANDIDATES TO FILL VACANCIES ON THE SOUTH CAROLINA WATERMELON BOARD

Pursuant to the provisions of the "Agriculture Commodities Marketing Act" of 1968, as amended, and Marketing Order No. 7 for South Carolina Watermelons issued by the Agriculture Commission of South Carolina, NOTICE IS HEREBY GIVEN that the terms of the following members of the South Carolina Watermelon Board expire as follows:

Terms expiring December 31, 2023

DISTRICT I	MARK WILLIAMS, ISLANDTON, SC
DISTRICT II	RUSTY KINARD, LODGE, SC
	SCOTTY SANDIFER, BLACKVILLE, SC

As a board member for the South Carolina Watermelon Board, you will be involved in watermelon advertising and sales promotion, research, prevention of unfair trade practices, cooperation with other agencies, market development programs, educational programs and determining the grades of acceptable watermelons in South Carolina.

If you are interested in becoming a SC Watermelon Board Member, you will need to request a petition. This petition can be requested by calling (803) 734-9807 or by emailing <u>elloyd@scda.sc.gov</u>. All petitions must be received by **Friday, December 15, 2023**. For a petition to be eligible/accepted, it must be signed by no less than five watermelon producers from the counties of the district seat you are petitioning for. Additionally, along with the submission of the petition, nominees will need to provide proof of producer verification (example: a receipt from a 1st purchaser).

USDA's commitment to equity spans the Department's mission areas and agencies. We are actively working to build a USDA that ensures none of our customers are ignored or left behind. The Discrimination Financial Assistance Program is just one of many programs helping USDA rebuild trust, address systemic issues and improve service to people who may have been underserved by USDA in the past. To learn more about USDA's equity work and resources, visit <u>usda.gov/equity</u>.

Terms of office are for 3 years. To qualify, a candidate must be a resident of South Carolina and of the district where he/she petitions for nomination. This person must be actively engaged in the production of watermelons within the State of South Carolina for a period of no less than one year. Additionally, during that one-year period, candidate will have derived a substantial portion of his/her income from watermelon production and shall continue to do so from the production of watermelons during their term of office. The SC Watermelon Board holds approximately 3 to 4 meetings per year to conduct business. Board members are reimbursed for mileage to and from meetings and paid a \$50 per diem per meeting attended.

District I includes the following counties: Darlington, Cherokee, Spartanburg, York, Lancaster, Chester, Union, Fairfield, Berkeley, Charleston, Richland, Florence, Marion, Clarendon, Sumter, Kershaw, Lee, Williamsburg, Georgetown, Horry, Dillon, Marlboro, Chesterfield, Aiken, Bamberg, Calhoun, Colleton, Dorchester, Lexington, Orangeburg, Abbeville, Anderson, Greenville, McCormick, Oconee, Pickens, Laurens, Greenwood, Edgefield, Saluda, and Newberry.

District 2 includes the following counties: Allendale, Barnwell, Beaufort, Hampton, and Jasper.

Frances H. Price, Chair The Agriculture Commission of South Carolina PO Box 11280, Columbia, SC 29211

CRANBERRY CREATIVITY INCORPORATE CRANBERRIES INTO YOUR WINTER COOKING AND PRESERVING BY CHASE MCINTOSH BAILLIE, CLEMSON COOPERATIVE EXTENSION

Fresh cranberries pack a punch as a component of fall and winter foods, drinks, and décor. With their small size, bright deep-red color, tart taste, and dense texture, they are versatile in sweet and savory applications. They are a seasonal fruit harvested in the fall, available from October to early January, and are only grown in eight states: South Carolina, unfortunately, isn't one of them. (However, they pair well with plenty of South Carolina-grown foods!) Wisconsin grows approximately 61% of the cranberries in the US while Massachusetts accounts for another 26%. New Jersey, Oregon and Washington state combine to make up the remaining 13%. (uscranberries.com)

One 12-ounce package of cranberries is about 3 cups of whole berries which can be easily stored in the refrigerator for 4 weeks and the freezer for about a year, just as they are, in the package they

come in, so stock up during the season. Cranberry producers like to say "Use one and keep two." They can also be rinsed in cool, running water, and dried in a salad spinner; or patted dry with a cloth, prior to being placed on a baking sheet to freeze individually, then placed in an airtight container or freezer bag.

Cranberries are a nutrient-dense food with essential vitamins and minerals, dietary fiber and other naturally occurring compounds that may have potential health benefits. They are naturally low in sugar and high in acid, giving them their tart taste; as a result they are generally not eaten raw. The flavor and texture can be calmed and the fruit transformed into a wide variety of new products by adding sweetener and other fruits and juices to make jams, jellies, pie filling, sauces, salsas and dips. Cranberries can be mixed with vinegar and

spices to make mustards or pickles; or with onions, nuts, raisins, and coconut to make conserves and chutneys. Any of these products would be great on their own, or mixed with cream cheese as an addition to your next grazing table, condiment tray; or anytime you want a sweet and tangy addition to your meal. Try the following sciencebased, tested recipes below for cranberry pickles, mustard, and conserve (a soft spread with fruit, nuts, raisins) and share your experience with us by using the hashtag #carolinacanning.

For more information on food safety, preservation, and upcoming events and classes, check the Clemson Extension Food Systems and Safety website at clemson.edu/food.

Chase McIntosh Baillie is Clemson Cooperative Extension's Food Systems and Safety Area Agent for Horry, Georgetown and Florence counties.

• ¹/₄ cup dry mustard

• 2¹/₂ tsp. ground allspice

Spiced Cranberry Pickles

Source: foodinjars.com

Yield: 4 pints, 8 half pints / Headspace: 1/2 inch Process Time: 10 minutes

This product can be made and served after melding for 24 hours and kept in the refrigerator for two weeks.

- 3 12-oz. bags of cranberries
- 3 cups apple cider vinegar
- ³/₄ cup filtered water
- ¹/₂ cup granulated white sugar
- I inch segment of
- fresh ginger sliced • 1 tsp. allspice berries
- ¹/₂ tsp. whole cloves
- 2 cinnamon sticks
- ¹/₂ tsp. black peppercorns

Prepare a water bath or steam canner, jars, and lids. Wash cranberries and remove stems and bruised berries.

In a medium saucepan, combine vinegar, water, and bring to a boil. Add cinnamon sticks to the brine. Place fresh ginger, allspice berries, whole cloves, and black peppercorns in a spice bag or tie them up in a length of cheesecloth. Add them to the brine.

Cranberry Mustard

Source: freshpreserving.com

Yield: 7 4-oz. quarter pint jars / Headspace: ¼ inch / Process Time: 10 minutes

Note: This product can be reduced by ½, served immediately, frozen, or stored in the refrigerator for 1 week.

• I cup red wine vinegar (at least 5% acidity)

• I cup water

- 2³/₄ cups fresh or frozen • ²/₃ cup yellow mustard seeds
 - cranberries (about 1 12-oz. bag)
 - ³/₄ cup sugar
- Prepare boiling water canner. Heat jars in simmering water until ready for use. Do not boil. Wash lids in warm soapy water and set bands aside. (Follow manufacturer instructions for lids.)

Bring vinegar to a boil in a medium saucepan. Remove from heat and add mustard seeds. Cover and let stand at room temperature until seeds have absorbed most of the moisture, about 11/2 hours.

• I Tbsp. Worcestershire sauce

Combine mustard seeds and liquid, water and Worcestershire sauce in a food processor or blender. Process until slightly grainy. Add cranberries and blend until chopped.

Bring cranberry mixture to a boil in a medium saucepan, stirring constantly. Reduce heat and simmer for 5 minutes, stirring frequently. Whisk in sugar, dry mustard and allspice. Continue to simmer, stirring frequently, until volume is reduced by a third, about 15 minutes.

Ladle hot mustard into a hot jar leaving a ¼ inch headspace. Remove air bubbles. Wipe jar rim. Center lid on jar and apply band, adjust to fingertip tight. Place jar in boiling-water canner. Repeat until all jars are filled. Water must cover jars by 1 inch. Adjust heat to medium-high, cover canner, and bring water to a rolling boil. Process quarter pint jars for 10 minutes, adjusting for altitude. Turn off heat and remove cover. Let jars cool 5 minutes. Remove jars from canner; do not retighten bands if loose. Cool 12-24 hours. Check lids for seal, they should not flex when center is pressed.

Once brine is boiling vigorously, add cranberries. Stir to combine and cook for 5-7 minutes, until the cranberries begin to pop and the brine has returned to a rolling boil.

When cooking time has elapsed, remove pot from heat. Remove spice bag/cinnamon sticks. Break cinnamon sticks in half and set aside.

Using a slotted spoon, ladle cranberries into prepared jars. Cover berries with brine, leaving ¹/₂ inch headspace. Place a cinnamon stick segment into each jar. Wipe jar rims, apply lids and rings and process in a boiling water bath canner for 10 minutes. When time is up, remove jars from canner and place them on a folded kitchen towel to cool. When jars are cool enough to handle, remove rings and check seals. Any unsealed jars should be kept in the refrigerator. Let jars sit for at least 24 hours before eating.

Cranberry Orange Conserve

Source: Bulletin #4045, umaine.edu

Yield: 4 half pints / Headspace: ½ inch / Process time: 10 minutes

Note: This product can be reduced by ½, served immediately, frozen, or stored in the refrigerator for 1 week.

- I unpeeled, finely chopped orange
- 3 cups sugar
- ½ cup seedless raisins
- 4 cups cranberries, washed
- ¹/₂ cup chopped nuts

• I cup water

Combine orange and water; cook rapidly until peel is tender (about 20 minutes). Add cranberries, sugar, and raisins. Bring slowly to boiling, stirring occasionally until sugar dissolves. Cook rapidly, almost to the jellving point of 220°F (about 8 minutes). As mixture thickens, stir frequently to prevent sticking. Add nuts during the last 5 minutes of cooking. Pour hot conserve into hot jars, leaving ¹/₄-inch headspace. Wipe rims of jars with a damp, clean paper towel. Adjust lids. Process in a boiling water or steam canner for 10 minutes at altitudes of 0-1000' above sea level. Let cool, undisturbed, 12-24 hours and check for seals.
