ACRE PROGRAM SEEKS AGRIBUSINESS PITCHES

ARE YOU A SOUTH CAROLINA AGRIBUSINESS ENTREPRENEUR?

BY SCDA

COLUMBIA – The Agribusiness Center for Research and Entrepreneurship (ACRE) at the South Carolina Department of Agriculture is accepting applications for the 2025 Advanced Entrepreneurship program.

South Carolina entrepreneurs selected for the program will have the opportunity to pitch to a panel of judges, competing to earn business mentoring and funding for their agribusiness. The awardees will be granted up to \$25,000 for their company or product.

Agribusiness Center for

Research & Entrepreneurship

In the seven years since it was founded, ACRE has awarded more than \$1,412,500 to 131 agricultural entrepreneurs, funded several industry-driven research projects, and led dozens of business workshops throughout the state.

Successful awardees have included:

- Blue Ridge Rabbit Meat Co., a family-run rabbit farm in Wellford (Spartanburg County) that raises and processes rabbits, shipping the high-quality meat to customers across the country.
- Project Victory Gardens, which leads workshops to help veterans transition to careers in agribusiness.
- Pee Dee-based Covered in Cotton, which developed a local supply chain for their awardwining luxury cotton products.
 - Vegetable grower
 Crescent Farm in Laurens
 County, which used
 ACRE funding to expand
 production.
 - Regenerative agriculturebased duck producer Vital Mission Farm, based in Wadmalaw Island.
 - Crossroads Processing (Lexington County), which expanded from deer into processing livestock to address gaps in the local market.

- Oswego Flowers (Sumter County), which grows unusual cut flower varieties. The 2024 ACRE grant award will help them buy a larger greenhouse to extend the growing season of cut flowers to year-round production and start shifting into wholesale production of cut flowers.
- The Pickled Pepper People (Greenville County), a company that makes spicy slaw from fresh vegetables that are locally and sustainably sourced, using a traditional Haitian family recipe.
- Growing Green Family Farms, which is using ACRE funding to expand their Good Agricultural Practices-certified packing shed and walk-in cooler, with which they can increase their own production and support other farmers in need of a food safety-certified space.

The Advanced Entrepreneurship application requires a business plan and a ready-to-launch prototype or sales history for the applicant's company or product. Applicants' businesses must be located in South Carolina. The application also includes a detailed guide to what ACRE is looking for in a business plan.

Applications are due Friday, March 7th by 11:59 pm.

ACRE has a separate program each fall for beginning innovators who have an agribusiness idea but don't have experience in business.

For more information, visit <u>acre-sc.com/programs</u> or contact Kyle Player at 803-734-2324 or kplayer@scda.sc.gov.

AGRITOURISM IS BOOMING IN SC

his week I had the pleasure of attending part of the South Carolina Agritourism Association's Annual Conference. It was held in Kershaw, Lexington, and Newberry counties this year, with some wonderful hardworking agritourism farms spotlighted during two days of tours:

- Bowers Farm
- Carolina Pride Pastures
- Enoree River Winery
- Farm 1780
- Goat Daddy's Farm
- Lever Farms

The kickoff dinner and other activities were held at Bar Figaro in Newberry. Farmers got many chances during the conference to network and learn. It was truly a celebration of South Carolina places and rural life.

I met up with the group at Lever Farms in Newberry County. My message to them was to use their venues while folks are there to have fun to remind them of what agriculture means to our state.

Agritourism has grown dramatically in this state over the past decade or so. We now have 612 agritourism farms listed on the South Carolina Department of Agriculture website. I can remember years ago when it was about 80.

The Census of Agriculture reports that between 2017 and 2022, farm income from agritourism in South Carolina grew

from \$6.2 million to \$14 million. I think that probably underrepresents the true value and economic impact of this activity, but it's a place to start understanding the importance of agritourism.

The South Carolina
Agritourism Association
is partly to thank for the
growth in the industry.
Director Jackie Moore
works hard to educate
farmers about how to
safely start an agritourism
venture and profit from it,
and she promotes those
farms very effectively. If
you have an interest, you
can join the association
and find resources by
visiting scagritourism.org.

As a farmer, you don't have to go all-in on agritourism; many farmers dip their toe in the water with some tours or other on-farm activities to find out if agritourism is right for them. This is a business where you have to enjoy being around people.

If you're looking to visit a farm, go to scfarmfun. org. We have listings for hundreds of farms, both association members and otherwise. You can also subscribe to a monthly newsletter listing events on farms across the state. The Agritourism Passport program is a fun way to visit more farms: As you people visit participating South Carolina farms, you can have your passport stamped to earn prizes.

the

UPCOMING EVENTS

Blessing of the Crops Oyster Roast & Fish Fry

February 13 • 6 – 8 pm

Southern Palmetto Regional Chamber is excited to host this 3rd annual event, gathering agricultural producers and supporters large and small to pray for a bountiful harvest, learn about what's happening in our region's ag sector, and break bread together. Tickets (include dinner & admission): \$20 Chamber Members / Market Vendors; \$30 General Admission; \$350 Table.

The Barn at Hutto Farms

417 Hudgins Road, Williston

FEDERAL ASSISTANCE APPROVED FOR SOUTH CAROLINA FOLLOWING SEVERE NOVEMBER FLOODING

BY SC GOVERNOR'S PRESS OFFICE

COLUMBIA, S.C. - Governor Henry McMaster announced in January that his December 13, 2024, request for a Major Presidential Disaster Declaration to provide federal aid to supplement state and local recovery efforts following severe November flooding in Bamberg, Calhoun, and Orangeburg Counties has been approved.

The Federal Emergency Management Agency (FEMA) approved Public Assistance program aid for Bamberg, Calhoun, and Orangeburg Counties. The program provides reimbursement to governmental agencies and certain nonprofits that were affected by the severe storms and flooding of November 6-14, 2024. The assistance can help cover costs for debris removal, emergency protective measures, public buildings and equipment, public utilities, and more. For additional information about FEMA's Public Assistance program, visit fema.gov/ assistance/public.

The declaration also approves Hazard Mitigation Grant Program assistance, which makes

cost-shared funding available to the state for approved projects that reduce or mitigate future disaster risks. Funds under this program will be available to state agencies, local governments, and certain nonprofit organizations only. A wide variety of potential projects are eligible.

The South Carolina Emergency Management Division (SCEMD) will conduct applicant briefings to inform potential applicants of the assistance available and how to apply. Applicants then file a Request for Public Assistance (RPA) and identify damage that resulted from the disaster. FEMA determines eligibility for reimbursement after state review. SCEMD will manage Public Assistance funds received from FEMA. This includes disbursing the funds to the applicant.

The governor's request for FEMA Individual Assistance, which provides help to individuals and households, is still under review.

Our 5th annual Grown in SC magazine is now available!

Read it online at agriculture.sc.gov/ magazine or grab a printed copy at upcoming SCDA events this year.

MARKET BULLETIN

SOUTH CAROLINA FARM TO SCHOOL SUMMIT SET FOR FEB. 21

DENISE ATTAWAY, CLEMSON UNIVERSITY

COLUMBIA, S.C. — Registration is open for the 2025 South Carolina Farm to School Summit, Bridging the Gap from Farm to School in South Carolina, scheduled for Feb. 21.

The summit begins at 8:30 a.m. at the University of South Carolina Pastides Alumni Center, 900 Senate St., Columbia, South Carolina, 29201. It ends at 3 p.m. Tickets are \$30. For tickets, visit scfarmtoschool.com/summit. Deadline is Feb. 10.

Educators, nutrition professionals, farmers and members of community organizations are invited to attend the summit, which aims to explore ways to incorporate fresh, local foods into schools. The event is hosted by the Clemson Cooperative Extension Service, the South Carolina Department of Education, and the South Carolina Department of Agriculture.

"This is an opportunity for key farm-to-school players to connect, provide resources and support, and empower both educators and farmers to continue the farm-to-school movement," said Carolyn Lindstrom of the Clemson Extension School and Community Gardening Program. "We invite everyone interested to join us for a day of learning, networking, and bridging the gap between schools and farms in South Carolina."

During the summit, educators will discover creative ways to integrate local foods into classrooms and

curricula. Nutrition service professionals, farmers, and agricultural producers will have opportunities

to build networks and resources to bring local foods to school cafeterias and support local agriculture.
Additionally, wellness and public health professionals, Extension agents, Master Gardener volunteers, community organizers, and policymakers will learn how to support farm-to-school initiatives in their areas.

The summit features two educational tracks: the Nutrition Services Track and the Schools and Education Track.

Topics covered in the Nutrition Services Track include school foods, micro-purchases and local procurement, implementing a Harvest of the Month program, and food safety and food waste.

The Schools and Education Track will address topics such as growing an agriculture program, building a farm, harvesting healthy habits, working with community partners, aquaponics, developing future farmers, and creating innovative school gardens.

Educators, nutrition professionals, farmers and members of community organizations ar invited to attend the South Carolina Farm to School Summit, Feb. 21, in Columbia, to explore ways to incorporate fresh, local foods into schools

For more information, visit scfarmtoschool.com/summit or email schoolgardens@clemson.edu.

Farm to School is a program designed to provide students with healthy, local foods as well as educational opportunities such as school gardens, cooking lessons and farm field trips. The program teaches children and their families how to make informed food choices while strengthening the local economy and contributing to vibrant communities.

RODENTICIDE USE TO BE RESTRICTED UNDER NEW STATEWIDE REGULATIONS

NEW RESTRICTIONS TOOK EFFECT FEB. 1, 2025

BY JONATHAN VEIT, CLEMSON UNIVERSITY

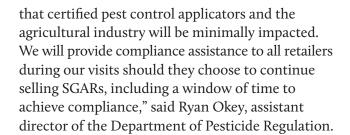

Clemson University regulators are imposing a statewide, one-year restriction on the use of second-generation anticoagulant rodenticides, known as SGARs, after research confirmed the chemicals are affecting non-target wildlife. In some cases, wildlife that feed on rodents have died from exposure to the chemicals.

The decision follows efforts that began in 2020 to reduce SGAR use in sensitive ecological areas through public education and voluntary programs. It also comes after an extended public comment period, which included dialogue with state and national pesticide industry members.

Clemson's Department of Pesticide Regulation is taking the action under state pesticide regulation Chapter 27–1075, Section B. Under the new restrictions, which took effect Feb. 1, 2025:

- A dealer license will be required to sell SGARs.
- Dealers must maintain records of all SGAR sales.
- Sales of SGARs will be limited to certified applicators, including commercial, noncommercial and private users.
- Verifiably trained technicians may apply RUPs commercially under the supervision of a certified applicator.

"We have designed these restrictions so

The restrictions come as the U.S. Environmental Protection Agency announced Nov. 29, 2022, that it will propose new mitigation measures to rodenticides due to environmental concerns. The EPA is expected to release an amended proposed interim decision and final interim decision later in 2025.

Researchers with Clemson University's Department of Forestry and Wildlife Conservation, along with other published and unpublished scientific data, show that active ingredients in SGARs have a high potential to cause adverse effects to non-target wildlife, even when used correctly under current

pesticide label directions. These ingredients include: brodifacoum, bromadiolone, difethialone, and difenacoum.

"Based on the research and coupled with the pending EPA restrictions on similar SGAR products, Clemson DPR believes it makes sense to implement these restrictions," said Steve Cole, executive director of Clemson Regulatory and Public Service Programs.

SC NEW & BEGINNING FARMER PROGRAM ACCEPTING APPLICATIONS

Program Dates: April – August 2025, consisting of 9 full day educational workshops and an in-person graduation event for those enrolled in the 'Certificate program.'

Cost: \$250.00/Person

New 'Audit' Option! The 2025 SCNBFP will offer two course options: An 'Audit' option for those who may not be able to commit to the full program, and a 'Certificate' option for those desiring to earn a certificate, as well as enjoy other benefits

Online Delivery! Training events will be hosted entirely online! (The exception will be Graduation for those enrolled in the 'Certificate' program).

Bonus Programming! Full day workshops will be complemented by optional bonus programming covering specialized topics such as Agritourism and E-Commerce. At no extra cost, these will be hosted online over the lunch hour.

Business Plan Contest! Select 'Certificate program' participants will have the opportunity to deliver short presentations of their business plans as part of the graduation event ... A total of \$5,000 in cash prizes to be awarded!

Who May Apply: Any current resident of SC, age 18 or older who has been actively farming for less than 10 consecutive years. Current land access not required.

How to Apply: Online applications only at scnewfarmer.org

Deadline to Apply: 11:59 PM, Sunday, Feb. 9, 2025

FISHERIES STUDENTS GAIN HANDS-ON EXPERIENCE MANAGING ATHLETICS POND

BY MARLON MORGAN, CLEMSON UNIVERSITY

Troy Farmer's fisheries management and conservation students are giving a whole new meaning to "catch and release."

During the Fall 2024 semester, Farmer, a Clemson University associate professor of fisheries ecology, and his graduate assistant Jacob Daley, took a group of students from their class to John D. Long Lake in Union County, South Carolina, where they joined fisheries biologists from the Clemson office of

the South Carolina Department of Natural Resources to remove more than 200 largemouth bass. The fish were then transferred to campus where the remainder of the class measured, tagged, and catalogued each one before releasing them into Clemson's athletics pond, which is in dire need of predator fish to combat the over-populated bluegill prey fish.

"Not only do the students get to learn the theory of fisheries management, but they get to get their hands dirty and experience management firsthand and see what it's like," Farmer said.

more bass.

Farmer's classes have been working with Clemson's athletic department to manage their pond for several years. A class study showed that the pond was overcrowded with bluegills and there were very few predator fish, such as largemouth bass, to keep the number of

prey fish down. The recommendation was to add

Farmer's classes stocked bass twice previously, once with about 150 and then around 120, he said. This time, more than 200 bass were added to the pond.

"It takes a lot of predators in the pond to bring the pond back to balance," Farmer said. "We anticipated a multiyear effort, so we'll continue that effort and every year assess to see where we stand."

At Long Lake, two students joined Farmer and Daley on the University's boat, while two others teamed with William Wood, a fisheries biologist for DNR, on his boat. The specially equipped boats scoured the lake electrofishing primarily for largemouth bass. The fish were temporarily stunned, causing them to rise to the lake's surface where the students netted them and placed them into a tank.

After one pass around the lake, the students unloaded their hauls on a DNR transport truck, switched boats and made another pass around the lake.

"It was my first time going out with DNR," said senior Garrett Van Camp, an agriculture major from Rock Hill, South Carolina. "It was a cool experience to see how they manage lakes around the state. It was nice to see the different structures along the lake and where the fish were held up and what DNR does to manage the overcrowding of their lakes. We've done other experiments like this in class, but it was cool going out in the field with DNR and seeing firsthand how they do things."

Troy Farmer's classes have been working with Clemson's athletic department to manage their pond for several years. A class study showed that the pond was overcrowded with bluegills and there were very few predator fish, such as largemouth bass, to keep the number of prey fish down. The recommendation was to add more bass.

DNR transported the fish to Clemson where the rest of Farmer's class measured and catalogued them before inserting passive integrated transponder tags to identify them and let them know which ones are surviving.

Mahnoor Qazi, a sophomore architecture major from Greenville, South Carolina, found the outdoor lab work interesting, even if it wasn't what she originally meant to sign up for.

"I thought this class was for my sustainability minor," she said. "I didn't find out it wasn't until I was registering for winter semester and my counselor asked why I was taking this class. I'm so happy I took it because it's so interesting. It's cool being outside and learning instead of being behind a board and learning the information. We get the actual experience here. And now it's going to count for my minor."

First and foremost, the class allowed the students to see how fisheries management works in the real world.

"My goal out of the project is that the students get a hands-on learning opportunity to really be the fisheries manager for the pond," Farmer said. "The athletics department has been great to work with. They allowed us to come in and sample the pond. DNR has been a great cooperator. They provide resources to assist us and help us in training our students. It's great also that the students get to meet some of the biologists and have some back-and-forth and see what a DNR fish biologists' life is like.

"But my goal is that the students get to collect the data, analyze the data, make some recommendations and at the end of the semester

we get to implement those recommendations. They get to see the whole process, from data collection and analysis, to making a recommendation, to achieving management objective, which is hopefully balancing the pond so there's good fishing for both largemouth bass and bluegill."

Not only is the project beneficial to the students, but is it helping Daley, who is studying for his doctorate in wildlife and fisheries biology.

"This gives me a lot of practice," Daley said. "Dr. Farmer takes the lead, but I get to see how to interact with students, what works with students, how I should act in a professional environment in the

classroom. I get to see how my communication methods work and what doesn't work."

Finally, DNR gets assistance in managing Long Lake, which is overpopulated with bass, share their knowledge with students, and get an early peek at what could be some of their future employees.

"This helps us by removing some of the bass so we can allow the bass that are still there a more abundant food source because it's not trying to feed so many mouths," Wood said. "That way, hopefully we can continue to improve the fishing in that lake.

"It's awesome for us to have the University right here. It gives us an opportunity to pass on some of the knowledge we get as resource managers to the students. It gives them an opportunity to see a little bit of what we get to do in our jobs. I hope it helps them to decide is this what's good for me or do I need to look at something else. Generally, whenever students do come out and help us, they all are motivated to learn, which is a wonderful thing for us to see. That's what we want in our future staff members."

Farmer said they may do a spring assessment to see if another restocking is needed at that time.

APPLICATIONS NOW OPEN FOR SC COMMISSIONER'S SCHOOL FOR AGRICULTURE

The South Carolina Commissioner's School for Agriculture (SCCSA) provides challenging and enriching college-based experiences for a limited number of rising 11th and 12th grade students. The 2025 session will be held July 19-25.

SCCSA is designed to inform, inspire and challenge student participants to consider a career in the agricultural, natural resource and life science industries as well as to be model citizens of leadership and influence for these industries as they embrace an agriculturalist philosophy.

Commissioner's School students declare an emphasis in plant sciences, livestock production, or forestry and natural resources, and spend sessions exploring this specific field through hands-on activities led by professionals in the field. Students also attend educational sessions led by Clemson staff on topics such as packaging science, athletic turfgrass, and precision agriculture and safety. Industry tours and a variety of enrichment activities round out the weeklong session.

SCCSA is a partnership between the South Carolina Department of Agriculture and Clemson University College of Agriculture, Forestry and Life Sciences.

ELIGIBILITY:

- Currently a high school student in 10th or 11th grade on track to enter 11th or 12th grade. (Homeschooled students are eligible)
- Genuine interest in pursuing a college degree related to agriculture and natural resources.
- Must not have previously attended the South Carolina Commissioner's School for Agriculture.

Applications are available at <u>clemson.edu/cafls/sccsa</u>. The application deadline is March 13, 2025.

GOVERNOR NAMES 2025 SOUTH CAROLINA CHEF AMBASSADORS

BY SCDA AND SCPRT

which collectively contribute tens of billions of

dollars to the state's economy and account for

hundreds of thousands of jobs statewide.

"Today's travelers are looking for authentic

experiences, and they see food as an essential

pathway to getting a true taste of a destination,"

Governor Henry McMaster announced chefs from Greenville, Conway, and North Charleston will represent South Carolina as 2025 Chef Ambassadors. He was joined by the Commissioner of Agriculture, Hugh Weathers, and the Department of Parks, Recreation & Tourism Director, Duane Parrish.

"Food is an important part of our state's history, culture, and economy, and it's where two of our largest industries tourism and agriculture - overlap and excel," said McMaster. "Our world-class culinary talent is highlighted and celebrated through the Chef Ambassador program, showcasing the best of South Carolina chefs, farmers, and locally grown products. I congratulate the 2025 class on this tremendous culinary honor."

C 2

Chef Ambassadors represent the state through food festivals and other promotional opportunities, sharing South Carolina's culinary traditions, agricultural heritage, and undiscovered places with the world. They support our state's farmers by using Certified South Carolina produce, meats, dairy, seafood, and other farm-fresh foods.

"Our Chef Ambassadors help people learn about the roots of their food – how it's grown and who grows it. Food and agriculture are part of who we are in the Palmetto State," Weathers said. "On behalf of South Carolina's farmers, I'm pleased to welcome the 2025 class of Chef Ambassadors to showcase their talents and represent their communities throughout this year and beyond."

Now in its 11th year, the South Carolina Chef Ambassador program launched in 2014, unifying the major industries of tourism and agriculture, Parrish said. "Countless vacation itineraries are planned around reservations at the destination's top-rated restaurants, or in some cases, having a meal at the backroad barbecue joint you saw on social media is actually the inspiration for the entire weekend getaway. Chef Ambassadors are an essential ingredient in our state's recipe for tourism success, helping fuel our tourism industry and boost our economy. The 2025 class will add their own flavors and perspectives to the rich culinary story we share with the world as we invite visitors to discover South Carolina."

L-R: Chef Darren Smith, Chef Shuai Wang, and Chef Jeanne Koenigsberg

Chefs are appointed by the Governor, and the program is run through a collaborative effort between the South Carolina Department of Parks, Recreation & Tourism (SCPRT) and the South Carolina Department of Agriculture (SCDA).

The 2025 South Carolina Chef Ambassadors are:

Jeanne Koenigsberg, executive chef and kitchen general manager of Swamp Rabbit Cafe and Grocery, Greenville

"I'm humbled to accept this nomination in a non-traditional food service establishment. It reminds us that the work we are doing is important

to our community and surrounding communities."

Darren Smith, owner and executive chef of Rivertown Bistro and Bonfire, Conway

"I have been cooking professionally for 36 years and have had the privilege of owning Rivertown Bistro for 30 of those years. Throughout my career, I've been committed to showcasing the incredible bounty of South Carolina, from the rich harvests of

local farms to the fresh seafood from our coastline just miles away."

Shuai Wang, chef and owner of Jackrabbit Filly and King BBQ, North Charleston

"This opportunity is a great way for me to showcase just how easy it is to support your local farmers and fishermen, and that any cuisine is able to utilize what is locally grown seasonally. I grew up in New York, and I never thought I would live anywhere in the South when I was young. When I came down to Charleston to visit one year, I completely fell in love. I worked with some local farms in New York, but not nearly as many or with this amount of variety that is available in Charleston."

THE NATIONAL ASSOCIATION OF STATE DEPARTMENTS OF AGRICULTURE SETS ITS FEDERAL POLICY FOCUS FOR 2025

BY NASDA

NASDA's members-led Board of Directors chose five issues to serve as the organization's primary policy focus for 2025. They include the farm bill, food systems, pesticide regulations, PFAS and state cooperative agreement funding. NASDA CEO Ted McKinney remarked on the significance of these issues for 2025.

"NASDA members have specified these areas as necessary to work on to best support farmers, ranchers and communities nationwide," said McKinney. "Further, we believe these areas represent critical opportunities where state departments of agriculture can lead impactful change and champion effective policy solutions this year."

NASDA has published one-pagers offering background and insight for each policy priority.

FARM BILL

The upcoming farm bill must be dedicated to supporting American agriculture and essential food and nutrition assistance programs. This bill shapes agricultural policy, supports farmers, ensures food security and promotes sustainable natural resource management.

FOOD SYSTEMS

NASDA will advocate for policies and programs that fortify U.S. food systems, enhance supply chain resilience, and improve reliable access to nutritious foods.

PESTICIDE REGULATIONS

NASDA will engage with EPA to ensure sciencebased standards and state input are incorporated in regulatory initiatives such as the Endangered Species Act Workplan.

PFAS

NASDA will continue to work with federal agencies to develop strategies associated with the risk of per-and-poly-fluroralkyl substances (PFAS) on agricultural land. NASDA will advocate for federal programs that will support farmers and ranchers in maintaining the health and productivity of their land and livestock.

STATE COOPERATIVE AGREEMENT FUNDING

NASDA will advocate for Congress to restore and increase funding for cooperative agreements. Cooperative agreements are designed to increase coordination when addressing complex regulatory issues and sharing resources between state and federal governments. NASDA is focused on three cooperative agreements that require immediate attention: FDA's State and Local Food Safety Programs, USDA's State Meat and Poultry Inspection Programs, and USDA's Animal Disease Protection Program.

NASDA is a nonpartisan, nonprofit association which represents the elected and appointed commissioners, secretaries and directors of the departments of agriculture in all 50 states and four U.S. territories. NASDA enhances American food and agricultural communities through policy, partnerships and public engagement. To learn more about NASDA and its 2025 policy advocacy, please visit nasda.org/policy.
